To

RICHARD HUGHES, Esq., M.D., BRIGHTON, ENGLAND,

THE INDEFATIGABLE TEACHER OF

MATERIA MEDICA,

THIS BOOK IS

RESPECTFULLY DEDICATED.

PREFACE.

WHEN I, four years ago, came to a determination to go through all our materia medica, and not, as formerly, exclusively deal with the more important medicines, it became immediately clear to me that our handbooks of materia medica (excepting the *Encyclopædia* of T. F. Allen) did not embrace the whole list of homœopathic remedies. The excellent handbook of Professor Allen contained the greatest number, while the text-books of Drs. Cowperthwaite and Jessen (the latter also a good book for the wants of practitioners) have been found more serviceable in size for daily employment. I accordingly took the text-book of Cowperthwaite as my basis, and added to this a great number of notes, which the author intends to embody in the new edition. The remedies, that were not found by me in the text-book of Cowperthwaite, I in particular brought together to form a text-book of materia medica and therapeutics of the rare homœopathic medicines. A physician, by means of the text-book of Cowperthwaite and with the help of the present Supplement, will now have the whole homœopathic materia medica at his disposal. For this text-book I have used the following works: *Encyclopædia of Pure Materia Medica*, ten vols., of T. F. Allen;

T. F. Allen, *Handbook of Materia Medica and Homœopathic Therapeutics*; Farrington, *Clinical Materia Medica*; H. C. Jessen, *Therapeutical Materia Medica*; Dunham, *Lectures on Materia Medica*; Dunham, *Homœopathy, the Science of Therapeutics*; Dewey, *Essentials of Homœopathic Materia Medica*; Burt, *Materia Medica Memorizer*; Hughes and Dake, *Cyclopædia of Drug Pathogenesis*; Hughes, *Manual of Pharmacodynamics*; Hering, *Condensed Materia Medica*; E. M. Hale, *Materia Medica and Spec. Therapeutics of the New Remedies*; Kippax, *Diseases of the Skin*; Helmuth, *Surgery*; Arndt, *A System of Medicine*; Franklin, *Venereal Diseases*; Clarke, *The Prescriber*; A. Chargé, *Traitement hom. des maladies des organes de la respiration*; C. Heinigke, *Handbuch der Homœop. Arzneiwirkungslehre*; Bähr, *Die Therapie*; Kafka, *Die hom Therapie*; Altschul, *Reallexikon für hom. Arzneimittellehre*; Puhlmann, *Handbuch der homöopath. Praxis*; and Schüssler, *Eine abgekürzte Therapie, &c.*

The grand characteristics are printed in italics, the minor characteristics in common letters; and under the heading "therapeutics" often clinical symptoms are stated.

I entertain the hope that my long and laborious work may be of use to many colleagues, as hitherto the majority of these rare medicines have been scattered broadcast over the large fields of homœopathic literature.

OSCAR HANSEN, M.D.

COPENHAGEN, October 2, 1898.

**A TEXT-BOOK OF
MATERIA MEDICA AND THERAPEUTICS
OF RARE HOMŒOPATHIC REMEDIES**

ACONITINUM.

Therapeutics.

Neuralgia, especially of nervus trigeminus; the pains particularly in the supraorbital nerve, aggravated by motion and agitation. Recommended by Hughes in 3rd dec. dilution.

ACONITUM FEROX.

Characteristic Symptoms.

Dyspnœa; must sit up. Respiration rapid. Anxiety, with suffocation, from feeling of paralysis in respiratory muscles.

Therapeutics.

Palliative in cardiac dyspnœa (with "Cheyne-Stokes' respiration"). (*Curare, Phosphor.*)

More violent and fatal in its effects than *Aconitum napell.* Name in India, *Bisch* or *Bikh.* Contains most "Pseudoaconitin," *Aconitum nap.* most *Aconitin.* Seems not to cause neuralgia trigemini.

ADONIS VERNALIS.

Therapeutics.

Makes the contractions of the heart more powerful, the pulse more regular. The secretion of urine increases greatly. Albumen casts, and hydrops disappear. Recommended in valvular diseases of the heart and hydrops herewith. Asthma cardiacum. Used most in mother tincture; 5–10 drops pro dosi.

AESCULUS GLABRA.

Characteristic Symptoms.

Vertigo, with reeling like that of drunkenness. Confused stupor. Heaviness of head. Thickness of speech. Cramp in stomach. Great weakness. Trembling and strong tendency to contraction of legs.

Therapeutics.

Paresis of the legs in spinal diseases with decreasing power of vision.

AETHIOPS ANTIMONIALIS.

Therapeutics.

Recommended in 3rd dec. trit. in scrofulous ophthalmia, especially with phlyctænes on conjunctiva and cornea.

AGAVE AMERICANA.

Therapeutics.

Scurvy. Stomacace. Painful erections with gonorrhœa. (*Merc.*)

ALCOHOL.

Therapeutics.

Grauvogl found that diphtheritic membrane was dissolved and its growths destroyed by *Alcohol*. In the form

of brandy and water it tends not only to destroy the growths, but also aids in counteracting the terrible prostration.

ALLIUM SATIVUM.

Characteristic Symptoms.

Dull pain in occiput in morning. Very, profuse flow of sweetish saliva in the mouth in forenoon, after supper, and night. Constipation, with constant dull pain in the bowels. Whitish very profuse urine; cloudy with nitric acid; bright-red spots, with itching and sticking on the inner side of labia majora uteri and by introitus vaginae. *Pale-red appearance of the tongue with effaced papillæ.* Constant rattling of mucus in the bronchi. Cough in the morning after leaving bedroom, with extraordinary profuse mucous expectoration, which is tenacious and difficult to raise. Sensibility to cold air.

ALNUS RUBRA.

Therapeutics.

Enlarged submaxillary glands. Leucorrhœa with erosions on cervix uteri, which bleed easily. Amenorrhœa, burning pains from back to pubis. Chronic herpes.

ALSTONIA SCHOLARIS.

Therapeutics.

Chronic diarrhœa of undigested food; bloody. From drinking bad water, especially of malarial origin. Valuable in the debility after exhausting fevers. Has been used in India for malarial fevers.

ALUMEN.

Characteristic Symptoms.

Burning pain down the œsophagus. Yellow diarrhœa, like an infant's; afterwards constipation. Blood with

stool. Urging to urinate. Frequent micturition. Pressure in fauces as from a plug, with dryness and feeling of a splinter or an ulcer. Tickling in larynx from talking, causing cough. Dry cough in the evening after lying down. (*Nux vom.*) Cramp-like drawing in planta of right foot.

Therapeutics.

Lead colic and constipation. Pharyngitis sicca. Hæmorrhages from the bowels in febris typhoidea, when there is discharge of great blood-clots.

ALUMINIUM METALLICUM.

Therapeutics.

Amblyopia from central origin. Tabes dorsalis. (Boeninghausen cured four cases with *Alumina* symptoms.)

AMMONIACUM (*Dorema ammoniacum*).

Characteristic Symptoms.

Vision dim, almost lost in evening. Mucous expectoration. Dyspnœa and oppression of chest. Respiration short and more in the upper part of lungs, with anxiety and discomfort. Oppression by inspiration, with stitches in left half chest. Constriction, with pain in the chest.

Therapeutics.

A good expectorant in humid asthma and catarrhal affections of the respiratory organs. Has relieved severe bronchitis with free mucous expectoration, stitches in the chest, frontal headache, and dim vision. Cough worse evening and night with free expectoration of stringy mucus. Often used in chronic bronchorrhœa with very tenacious expectoration, with a feeling as if something should be torn loose, the patient clutching at the sternum; worse at night. Farrington commends the remedy in asthenopia when the eyes smart and burn,

especially by artificial light. Injection and throbbing of the eyes, especially in canthi interni. It stands between *Belladonna* and *Ruta*.

AMMONIUM BENZOICUM.

Therapeutics.

Recommended in dropsy after scarlet fever, with scanty, dark, smoky-looking urine with a pungent smell.

AMMONIUM BROMATUM.

Characteristic Symptoms.

Feeling of a band above ears. Smarting in the mouth, as if burnt, in the morning. White, sticky, blood-streaked mucus in posterior fauces. Irritation in throat with inclination to cough. Cough in evening from tickling in the throat. Expectoration of white sticky mucus.

Therapeutics.

Neuralgia of left ovary. Good remedy in chronic laryngeal catarrh of speakers ; dry, spasmodic, continuous cough, especially at night, with tickling, heat and burning. Recommended in pseudocroup, croupous bronchitis, diphtheritic laryngeal croup, chron. catarrh of nares posteriores. Bronchitis chron. with acute aggravation, rattling in the chest, with difficult and painful expectoration. The pains are relieved by pressing the hands against the chest ; bad sleep on account of the attacks of cough ; decrepid complexion. H. C. Wegge, M.D., of Copenhagen, recommends the remedy in aqueous dilution, 1-10, ten drops *ter die*, in chronic pharyngitis with following symptoms : Burning in fauces ; white, thick, frothy also stringy mucus in the throat and fauces. Need of hawking. Preparation to swallowing difficult, but the swallowing unimpeded. Vomiting of food by clearing the throat. The symptoms worse in morning.

AMMONIUM IODATUM.

Therapeutics.

Chronic laryngitis and bronchitis, croupous bronchitis, and tuberculosis laryngis: Similar to *Jodium* in the effects, but more intensive.

AMMONIUM PHOSPHORICUM.

Therapeutics.

Valuable in some cases of nodosities of the joints of the fingers and backs of the hands. Chronic cases in which there are deformities of the joints by these nodes, arthritis deformans. Chronic bronchitis in gouty patients. Paralysis facialis. Neuralgia rheumatica in the shoulder-joint. (Good remedy.)

AMMONIUM PICRICUM.

Therapeutics.

Periodical neuralgia in right side of occiput, boring pains extending to the ear, orbit, and jaw, vertigo on rising, especially in irregular menstruation.

AMPELOPSIS QUINQUEFOLIA.

Therapeutics.

Chronic hoarseness in patients who were scrofulous in their youth.

AMYGDALA AMARA (*et persica*).*Characteristic Symptoms.*

Dark-red injection of fauces, uvula and tonsils. Sharp, lancinating pains, so that the patient must cry out. Considerable difficulty in swallowing. General prostration.

Therapeutics.

Diphtheria. Tonsillitis.

ANACARDIUM OCCIDENTALE.

Characteristic Symptoms.

Vesicular eruption on the face usually, but also on other parts of the body. Intolerable itching with umbilicated pustules, as in small-pox. Erysipelatous eruption on the face, spreading from the left to the right. (In the proving of *Rhus* the erysipelatous inflammation goes from right to left.) Stiff neck, worse from beginning to move. *Anacardium occidentale* is antidote to *Rhus* erysipelas.

ANATHERUM MURICATUM.

Characteristic Symptoms.

Pressure and burning pains in the bladder, with urging to urinate every minute; the bladder cannot hold the smallest quantity of urine. Urine turbid, thick, full of mucus. Incontinentia of urine with involuntary urination when walking and at night in bed during sleep. Pains in the uterus as if it was twisted and compressed. Burning pains in the uterus, extending into the kidneys. Swelling and spasm of uterus. Sterility. Itching, and eruption like lichen.

Therapeutics.

Cystitis. Incontinentia urinæ. Dysmenorrhœa, neuralgic and spasmodic. Recommended in Lichen simplex.

ANGUSTURA VERA.

Characteristic Symptoms.

Tensive pain in the temporal muscles when opening the jaws. *Drawing in the facial muscles. Pain in the masseter muscles*, as if one had fatigued them by chewing too much. Violent palpitation of the heart when sitting or sleeping, with a painful sensation as if the heart were constricted. (*Cactus grandifl.*) Cutting pains under right scapula to the nipple. Stiff pain, *like drawing*, be-

tween the scapulæ and in the nape of the neck, as in electric shock. Jerking stitches in the left thigh and in the upper border of the ilium, extremely painful, and felt only when sitting.

Therapeutics.

Caries, especially of the long bones (*T. F. Allen*). Facial pain, one case cured with 1st cent. dil. (cited by *R. Hughes*). Necrosis of the lower jaw (*Farrington*). A confirmed clinical symptom is: craving for coffee (*Dunham, Bœnninghausen, Aegidi*). Tenesmus recti, with soft stool; urging to urinate, with copious flow; injury of periosteum (*Ruta*) with incipient muscular contractions are confirmed clinical indications. The remedy has also been recommended in tetanus traumaticus, trismus, anæsthesia nervi trigemini, and myelitis.

ANISUM STELLATUM.

Characteristic Symptoms.

Phthisis pulmonum, with *pain at the third right costal cartilage.*

ANTHRACINUM.

Therapeutics.

Anthrax or carbuncle with cutting and lancinating pains; the symptoms are the same as under *Arsenicum*, but more intense, when *Arsenicum* does not relieve.

ANTHRAKOKALI.

Therapeutics.

Recommended in 3rd dec. trit. in psoriasis.

ANTIMONIUM ARSEMITUM (*Stibium arsenicosum*).

Therapeutics.

Excessive dyspnœa in emphysema pulmonum and cough, aggravated by eating and lying down. Asthma; cough

with yellow expectoration. Pleuritis. Pneumonia catarrhalis. Pericarditis. Stenocardia.

ANTIMONIUM SULPHURATUM AURATUM.

Characteristic Symptoms.

Nose-bleed on washing.—Increased secretion in nose, throat, and bronchi. Difficult respiration.

Therapeutics.

A good remedy in acute and chronic nasal and bronchial catarrh. Acne pustulosa.

ANTIPYRINE.

Therapeutics.

Nervous headache, pain in paroxysms. Dysmenorrhœa with profuse menstruation. (Good remedy, often found confirmed by H. Siemsen, M.D., of Copenhagen.) Severe after-pains. Enuresis nocturna and diurna in children, when other remedies fail to cure. (Often recommended.) Erythema, *first in face and on the arms, appearing last on the legs.* Urticaria, especially in women, *chronic*, with great itching and bulbous eruptions. Pseudomembranes on the tonsils and fauces, resembling croupous diphtheria, great prostration and albuminuria. Much recommended as useful hæmostaticum in profuse epistaxis (1-10) on cotton, and verified in practice.

APIUM GRAVEOLENS.

Therapeutics.

Profuse discharge from granulating ulcers, intense constriction over sternum, with drawing sensation through to back on lying down.

APOCYNUM ANDROSEMIFOLIUM.

Characteristic Symptoms.

Pains in all joints. Cramp in soles, worse in the right, with burning and pain in joint of left big toe. Tingling pains in toes. Profuse sweat of the whole body, with violent heat in soles.

Therapeutics.

Acute rheumatism, with great stiffness. Chronic articular rheumatism with swelling of the joints and vomiting of bile. General rheumatic pains.

AQUA SILICATA.

Therapeutics.

Used externally, undiluted or diluted with water in ulcers, especially ulcers varicosa cruris. The ulcer mostly red, granulating, only little coating (*Author*).

AQUILEGIA VULGARIS.

Therapeutics.

Clavus hystericus of women in climaxis, with vomiting of green substance, especially morning. *Globus hystericus*.

ARANEA SCINENCIA.

Characteristic Symptoms.

Constant twitching of the under lids.

ARBUTINUM.

Therapeutics.

The glucoside of *Arbutus uva ursi* is recommended by Heinigke in catarrh of the bladder, gravel in the urine, and involuntary urination.

ARSENICUM BROMATUM.

Therapeutics.

Acne rosacea, with violet papules on the nose. Diabetes mellitus.

*Fair usage policy applies

Therapeutics.

Epilepsy without aura, the attacks have been brought on by violent emotions, especially by fright. Several convulsions close together, then a long interval of rest. The paroxysmus followed by sleep. Valuable also in "petit mal."

ARUM MACULATUM.

Characteristic Symptoms.

The tongue so much swollen that swallowing is impossible. Stitching, as from many little needles, and burning on the tongue, lasting several hours. Vomiting of blood. Sleepiness, almost uncontrollable, especially an hour after dinner, with red face.

ARUNDO MAURITANICA.

Therapeutics.

Constant diarrhoea of nursing children. Catarrh of the middle ear. Eczema of the chest, upper extremities and behind the ears. Eruption papular; intolerable itching and crawling sensation. In young children.

ASIMINA TRILOBA.

Therapeutics.

Acne; itching red pimples, first on the left, then on the right side. Pustular acne with itching in the evening, when undressing.

ATROPINUM.

Characteristic Symptoms.

Delirium; when spoken to often turns his head to the wrong side. Unconsciousness. Sticking in base of skull, and especially over eyes, on every motion, and aggravated by stepping. Feeling as if screwed up, and walking caused sticking. Sticking in left temple in morning on

waking, extending behind ear, aggravated by moving about in open air. Pupils dilated. Diplopia. Red and hot face. Expression of mania. Dryness in the throat. Swallowing produces suffocative spasms, is painful, with grimaces and facial spasms. *Vomiting of milk and of all food.* Contractive, burning, pressing pain of the pit of the stomach with soreness. Empty eructations. *Stiffness of left knee, left leg, and in right great toe.* Redness like scarlatina over face and upper half of body; skin hot and dry.

Therapeutics.

Neuralgia, supraorbital, aggravated by emotions, under the knee, ameliorated by wrapping up warmly. Ear-ache, meningitis, spinal irritation, scarlatina with *Belladonna* symptoms. *Atropine* is best adapted in the purely neurotic sphere of *Belladonna* symptoms (*Casper*). Chronic affections of the stomach, especially *ulcus ventriculi*, with great pains and vomiting of all food. (*Bähr, Kafka*; confirmed by author in many cases). Also recommended in syphilis, gall-stone colic, peritonitis, and in the sweat stage of intermittens (*Puhlmann*).

AURUM IODATUM.

Therapeutics.

Chronic pericarditis, valvular diseases of the heart, arteriosclerosis, hypertrophy of parotis, ozoena, lupus, chronic gonorrhœa, and inveterated lues. Ostitis after abuse of *Mercury*, chronic metritis, myomata uteri, ovarian cysts, purulent otorrhœa, with inflammation of *processus mastoideus*.

AURUM MURIATICUM.

Characteristic Symptoms.

Sadness. Red swelling of the left side of the nose, the cavity deep ulcerated, dry, yellowish scurfs and sense

of obstruction. Offensive watery discharge from the nose. Heat and itching in vagina and vulva. Light-yellow leucorrhœa, worse morning. Otherwise like *Aurum metallicum*.

AURUM MURIATICUM NATRONATUM.

Therapeutics.

Hysteric spasms, unconscious for several hours, the spasms beginning with coldness in abdomen, hypertrophic inflamed uterus. Induration of the tongue. Obstinate leucorrhœa with spasmodic contraction of the vaginal muscles. Metritis chron. Prolapsus uteri. Induratio portio vaginalis uteri and of the ovaries. Hypertrophia of uterus and the ovaries. Ulcerations of collum uteri and vagina from inflammations. Anteversio uteri. Greenish-yellow leucorrhœa.

AVENA SATIVA.

Therapeutics.

Debility after exhausting diseases—viz., influenza, cholera, &c. Tuberculosis pulmonum, sleeplessness, and especially *subweaning from abuse with Morphium*. 5–10 drops mother tincture pro dosi.

BACILLINUM (see *Tuberculinum*).

Therapeutics.

Tuberculosis pulmonum, tubercular meningitis and arthrititis. Constant disposition to catch cold. Burnett, of London, praises it much.

BALSAMUM PERUVIANUM.

Therapeutics.

Bronchitis and tuberculosis pulmon., with muco-purulent expectoration, thick, creamy, and yellowish white.

By auscultation, loud râles in the chest. Night-sweats and hectic fever.

BARYTA ACETICA.

Characteristic Symptoms.

Wavering long between opposite resolutions. Forgetful of words, or when it should be spoken, or in a speech (*Baryta carb.*). Feeling of a cobweb in the face (*Alumina, Graphit.*). Frequent tenesmi to stool with pain in the lumbar region. Drawing pains down the whole left leg. Crawling here and there in the skin with burning stitches.

Therapeutics.

Neuralgia. Paralysis. Hughes says that the paralysees are more severe than in *Baryta carb.* The paralysees are in the extremities and from there in the whole body. Sensorium normal.

BARYTA JODATA.

Therapeutics.

Best remedy in indurated glandular tumours of tonsils, testes, and prostata (*Hale*). Strumous ophthalmia, with tumefaction of the cervical glands and the growth of the patient stunted (*Liebold*).

BARYTA MURIATICA.

Therapeutics.

Whizzing and buzzing in the ears on chewing and swallowing. Chronic and scrofulous hypertrophy of the tonsils (also externally 1 drop liquor *Barytæ mur.* in one half-cup of tepid water to gargling morning and night). Paresis of the pharynx and tuba Eustachii with clacking sounds of swallowing and sneezing, the air goes too easily into the cavum tympani (*Allen*). Aneurisma with

following symptoms : palpitation of the heart, fulness of the chest and swelling of the thorax close to the sternum. 1st dec. dil. shall here be a good remedy; one case of aneurisma of aorta descendens, where death was near, was cured completely in six months (*Allen*). Swelling and induration of the liver, pancreas, and mesenteric glands. Onania. Good remedy in nymphomania from local irritation and satyriasis. Violent burning colic, with vomiting of mucus and water. Paralysis of hands and feet with ice-coldness, also of the body (*H. C. Fessen*). Paralysis of sphincter vesicæ. Scrophulosis florida. Tumor albus (*Altschul*). Profuse suppurating eruption on the scalp. Hammond uses *Baryta carb.* and *mur.* in multiple sclerosis of the brain and spinal cord (especially in children), also in defective evolution of the brain in infants.

BELLIS PERENNIS.

Therapeutics.

Burnett says that *Bellis* is a good remedy in complaints due to cold drink, or cold food, when the body is heated; also in affections from cold wind, when the patient is hot. Externally recommended in nœvi.

BLATTA AMERICANA (*orientalis*).

Therapeutics.

Ascites in nephritis. Attack of asthma (emphysema pulmon. with bronchitis).

BOLETUS LARICIS.

Therapeutics.

Night-sweat in phthisis pulmon. Quotidian intermittent fever with anorexia, jaundice, highly coloured urine and light chill. The sweat is light and without relief.

BORACICUM ACIDUM.

Characteristic Symptoms.

Pain in region of ureters. Frequent urging to urinate.

Therapeutics.

A solution of *Boracicum acidum* is often used as injection in chronic cystitis with good result.

BOTHROPS LANCIOLATUS.

Therapeutics.

Recommended by Farrington in aphasia.

BRACHYGLOTTIS.

Characteristic Symptoms.

Fluttering sensation in abdomen. (Crocus.) Pain in bladder after evacuation (Canthar., Merc. subl.), and in urethra with stinging in penis. Pressure in the neck of the bladder with soreness. Urging to urination.

Therapeutics.

Bright's disease from overwork. Dysmenorrhœa with chronic basic peritonitis and *fluttering in abdomen and right ovary.*

CADMIUM SULPHURICUM.

Characteristic Symptoms.

Chilliness and coldness. Hammering pains in the temples. Predominating chilliness; coldness, even when near the fire, after sleeping, with heat in the hands.

Therapeutics.

Scrofulous opacity of cornea. Facial paralysis from cold. Black vomiting in yellow fever. (*Arsen.*) Persistent vomiting of drunkards. (*Allen.*) Yellow, vesicular eruption. Catarrhal asthma with great constriction of the chest. (*Cactus, Zincum.*) Gastric catarrh with nausea, saltish, rancid, sour and bloody belching or vomiting; soreness in the pit of the stomach on pressure.

The pains are burning, cutting. Cramps of the stomach after beer. *Cadmium* is like *Arsen.* in the stomach symptoms, and there is amelioration by rest (like *Bryonia*).

CAINCA.

Therapeutics.

Recommended in albuminuria with dyspnoea in lying position, especially night; ascites and anasarca.

CAJEPUTUM.

Therapeutics.

Valuable in obstinate hiccough by talking, laughing, eating, or any motion.

CALCAREA ACETICA.

Characteristic Symptoms.

Vertigo on walking in open air. Sour and offensive eructations. Profuse, painless, not exhausting diarrhoea. Sweat every morning.

Therapeutics.

Membranous bronchitis. An obstinate case, in which many remedies failed, has been cured by this remedy. After frequent recidives many casts of the bronchial membranes were expectorated and the dying patient recovered (*Allen*). Membranous dysmenorrhoea in patients with *Calcarea habitus*. Adipositas. Migraine with great coldness in the head and much gastric acidity (*Clotar Mueller*). Recommended symptomatic by Bähr in chronic catarrh of stomach or intestines in children.

CALCAREA ARSENICOSA (*arsenicata*).

Therapeutics.

Epilepsy with *Calcarea* symptoms. Tabes mesenterica and chronic pneumonic phthisis with hæmoptysis (*H.*

*Fair usage policy applies

Knots or stony hard lumps in mamma. Stony, hard, indurated, glandular tumours. Dental fistula. (In the two last affections much used with good results by H. Siemsen, M.D., of Copenhagen.)

CALCAREA HYPOPHOSPHOROSA.

Therapeutics.

In action like *Calc. phosph.* Osteomyelitis. Phthisis pulmon., especially incipient. Better in many cases where *Calc. carb.* and *phosph.* are indicated, than these. Much used and recommended in early stage of phthisis pulmon. by the late intelligent E. F. Olsen, M.D., of Copenhagen. Neurasthenia, with profuse night-sweat, pale and emaciated countenance, loss of appetite and virile power.

CALCAREA IODATA.

Therapeutics.

Inflamed submaxillary glands. Meningitis tuberculosa. Hydrocephalus chron. Polypi of nose and ear. Adenoid vegetations of the nose. Hypertrophia tonsillaris. (H. Siemsen, M.D., of Copenhagen, recommends it much in these two affections.) The enlarged tonsils are filled with little crypts or pockets (*Baryta*); scrofulous children, pale, fat and weak. Chronic cough, day and night, night-sweat, hectic fever, green, purulent expectoration; especially chronic bronchitis of scrofulous children, thin, cervical glands much swollen. Best remedy in milium. Fibroma uteri.

CALCAREA MURIATICA.

Therapeutics.

Good remedy in moist porrigo capitis in children, 1st dil. (*R. Hughes*). Preventive in furunculi. Also used in solution as an abortive local application for boils, easing the pains.

CALCAREA SULPHURICA.

Therapeutics.

One of Schüssler's tissue-remedies. Valuable in suppurations; when the abscess is perforated or after incision and the *pus is yellow and thick*. Suppurations of the tonsils. Abscesses of the cornea. Suppurating wounds. Suppurative processes in the lungs. Deeper acting than *Hepar sulph.*, acts after this remedy ceases to have effect. *Silicea* comes in before this remedy to stimulate or prevent the suppuration (*Dewey*). Much recommended by H. Siemsen, M.D., of Copenhagen, in fibroma and myoma uteri, inoperable and with offensive hæmorrhage. Also in impetiginous eczema (*crusta lactea*) and torpid glandular swellings recommended by him. I have found it very valuable in dry eczema in children (*Author*).

CALENDULA.

Therapeutics.

Open wounds, very sore and painful, difficult granulation, tendency to inflammation and suppuration. Useful as local application in phlegmonous erysipelas, bad ulcers of os uteri, offensive leucorrhœa, and in carious root-toothache. Especially used in healthy, cuts, lacerated wounds, locally and internally. Better than *Arnica*. Ludlam recommends it in chronic endocervicitis and scrofulous ulcerations with much purulent leucorrhœa. Deafness (often from inflammation). *Calendula* diminishes the suppuration, heals often per primam intentionem, and was much used with good results in the American Civil War.

CALOTROPIS GIGANTEA (*Madar*).*Therapeutics.*

Tubercular leprosy. Lupus faciei. Violent pains in both legs, with swelling of knees and stiffness, cannot

walk. Highly recommended in primary anæmia of lues, also late in the disease. Mother-tincture here 1–5 drops four times a day.

CALTHA PALUSTRIS.

Therapeutics.

Pemphigus, bullæ are surrounded by a ring, much itching. On the third day they are transformed into crusts.

CAMPHORA MONOBROMATA.

Characteristic Symptoms.

Suppression of milk.

Therapeutics.

Nightly pollutions. Spermatorrhœa, hereafter painful erections and tenesmi vesicales. Spasm of muscul. constrictor cunni. Paralysis agitans. Eclampsia in children, also in dentition. Cholera infantum. (Good remedy.)

CAMPHORA RUBINI.

Therapeutics.

Very efficacious in the algid stage of cholera asiatica. Rubini, of Naples, principally employed this remedy in all stages of this disease, and with excellent results.

CANCER FLUVIATILIS (*Astacus fluviatilis*).

Therapeutics.

Eczema, with thick crusts on the scalp. Enlargement of the lymphatic glands. In acute or chronic urticaria with vehement itching and red blotches, when other remedies fail. *Clay-coloured stools in these affections.*

CANCHALAGUA.

Therapeutics.

Severe cases of intermitting fever in hot countries, with a general sore and bruised feeling, nausea and retching. The skin wrinkled like a washerwoman's.

CARBONEUM OXYGENISATUM.

Characteristic Symptoms.

Inclination to turn in a circle. *Jaws firmly clenched.* Anæsthesia of the skin, but the slightest touch with a hot iron recalls the sensibility. Great sleepiness for several days.

Therapeutics.

Trismus. Produces vesication along the course of nerves (sciatic, trigeminus, &c.), and hence resembles herpes zoster. Pemphigus, with large and small vesicles (*Farrington*).

CARBONEUM SULPHURATUM.

Therapeutics.

Menière's disease (*Caust., Salicylic acid*). Tinnitus aurium of long standing, with or without deafness, cured with 1st dil. The workers in it become impotent (*Hughes*).

CASCARA SAGRADA.

Therapeutics.

Sub-acute and chronic constipation (15 drops ter die of the fluid extract). Gastric headache, broad, flabby tongue, with thick, yellow fur and foul breath. Hæmorrhoid's with constipation. *Sub-acute and chronic rheumatism of the muscles and joints with obstinate constipation.*

CASCARILLA.

Characteristic Symptoms.

Knotty stools covered with mucus, colic and burning. Frequent pale red hæmorrhages from the bowels, the blood resulting from diseases of the blood-vessels. Amelioration by warm drinks.

CASTOR EQUI.

Characteristic Symptoms.

Cracked sore nipple in a nursing woman. Stitching pain in the chest.

CASTOREUM.

Characteristic Symptoms.

Discontented with everything. Frightful dreams. Tearing, pressing headache with soreness of the scalp, but often better by deep pressure or rubbing. Distension of abdomen with flatulence. Cutting colic before stool, better from pressure or bending double (*Colocynth*). Stool of bloody or of green mucus, or of whitish water with burning in anus. Menses premature, with pains in the abdomen and back.

Therapeutics.

In its action a close analogue to *Moschus*. It suits women with nervous symptoms, which precede fully developed hysteria (*Farrington*). Hysterical asthma. Nervous women, who do not recover fully after typhoid fever or other exhausting diseases, but continually are irritable, and suffer from debilitating and exhausting sweat.

CEANOTHUS AMERICANUS.

Therapeutics.

Chronic hypertrophy and inflammation of the spleen, pain in the whole left side, with violent dyspnoea. Persistent pains in hypochondrium, profuse menses and yellow leucorrhœa.

CEREUS BONPLANDII.

Characteristic Symptoms.

Pain through the globe of the eye (right or left) and orbit. Pain in chest, left side, and through the heart, also in left great pectoral muscle.

Therapeutics.

Recommended in hypertrophy of the heart.

CERIUM OXALICUM.

Vomiting of pregnancy. Whooping-cough with vomiting and usual hæmorrhage. Dysmenorrhœa in fleshy, robust women, with scanty discharge, ameliorated by thorough re-establishment of the menses.

CERVUS BRASILICUS.

Characteristic Symptoms.

Taste of doughy bread in the mouth.

CHAMAEDRYS (*Teucrium chamaedrys*).*Therapeutics.*

Recommended in chron. rheumatism and gout.

CHENOPODIUM ANTHELMINTICUM.

Characteristic Symptoms.

Slight dull pain a little below inferior angle of right scapula, but nearer the spine.

Therapeutics.

Intense pain below lower angle of right scapula, through to chest. Ear specialists recommend this remedy for torpor of nervus auditorius, inflammations of the middle and internal ear, when there is deafness to the voice, but great sensitiveness to the sounds of passing vehicles or a bell, though these sounds may not be violent.

CHININUM FERRO-CITRICUM.

Therapeutics.

Sub-acute and chronic nephritis with great anæmia. Morbus maculosus Werlhoffii.

CHLORALUM.

Characteristic Symptoms.

Bloodshot and watering of the eye. Conjunctiva congested. Dim vision. Partial paralysis of œsophagus.

(*Opium*). Copious micturition in bed without knowing it. (*Opium*). Red blotches on arms, legs, and face, then over the whole body, coalescing gradually, resembling measles, and surrounded with a marked capillary hyperæmia. Erythema of head and neck, aggravated by wine, beer, and spirits, with palpitation. Intense itching of the skin. Anæsthesia. Surface of the body "stone cold." Extreme dyspnoea with sensation of weight and constriction of the chest.

Therapeutics.

Morning frontal headache, better in open air. Asthenopia retinæ, with circles of light and black spots before the eye. Sea-sickness. (*Coccul.*, *Apomorphinum*, *Cucurbita Pepo*, *Petroleum*.) Asthmatic attacks, with sleeplessness. Erythema, urticaria, pruritus. Recommended in conjunctivitis (*Dyce Brown*).

CHLORETUM AURICUM-PLATINICUM.

(*Chloride of gold and platinum.*)

Therapeutics.

Caries or necrosis (*Farrington*).

CHLORUM.

Characteristic Symptoms.

Painful wearing sensation in vertex and down left side. Watery discharge from the nose, with thin excoriating coryza. Small, putrid-smelling ulcers and yellowish-white aphthæ in the mouth. Spasms of glottis, of vocal cords, constriction with suffocation. *Sudden dyspnoea from spasm of vocal cords*, with staring eyes, blue face, cold sweat over the body, pulse small and soft, temperature sinking. Suffocating in attacks, often followed by catarrh. *Inspiration comparatively free, but crowing,*

*Fair usage policy applies

The pains are stitching under right frontal bone. Constipation, fæces dry and hard, like a dog's.

Therapeutics

Recommended in intermittent fever.

CINCHONINUM.

Characteristic Symptoms.

Severe tensive pain in the forehead.

CINNABARIS.

Characteristic Symptoms.

Pain from right lachrymal duct around the eye to temple. (*Kali bichr.*) Pain from left canthus internus across the brows. Sensation on the bridge of the nose as if touched with a metal. Uneasy creeping and pressive sensation about ossa nasi, as from heavy spectacles. Dryness of the mouth and throat, must rinse the mouth on waking. Leucorrhœa, which causes pressure in vagina.

Therapeutics.

Blepharitis. Iritis syphilitica or Kerato-iritis, ulcers of the cornea with the above-named pains. Nasal catarrh with pain about the root of the nose. Angina faucium (also tonsillaris), with accumulation of stringy mucus passing through nares posteriores into the throat. (*Nitric Acid*). Indurated or long-lasting suppurating buboes. Easily bleeding, fan-shaped condylomata especially on prepuce. Chronic gonorrhœa, with either yellow, green, or white and thin discharge. Orchitis and epididymitis in gonorrhœa after the pains have ceased (*Author*). Indolent hard ulcer penis, deep and especially when other mercurial preparations have not ameliorated. Macular, vesicular, and squamous syphilides. In the two first-named forms I have very often found it excellent (*Author*). Good

remedy in scrofulous patients. Circular or kidney-formed syphilitic ulcers (*Author*). Congenital syphilis in scrofulous children. Syphilitic affections of the lungs. (Excellent remedy.)

CITRICUM ACIDUM.

Therapeutics.

Good in diphtheria. Checks excessive menstruation.

CITRUS VULGARIS.

Characteristic Symptoms.

Weakness of sight. Ringing as of a bell or a mill in the ears. Several teeth become decayed, and much pain in them. Pressure in epigastrium, seemed unable to draw breath. Sense of suffocation, with frequent irresistible yawning. Palpitation of the heart. Drawing in the arms, and especially the fingers, which become red and swollen with vesicles, discharging clear water and itching excessively. General itching, which prevent sleep. *Loss of sleep, with nocturnal restlessness.* Little sleep, tossing about and waking with a start.

Therapeutics.

Chilblains. Eczema.

COBALTUM.

Characteristic Symptoms.

Agreeable sensation on body and soul. Sleep difficult or unrefreshing, disturbed by lewd dreams. Pain in a hollow tooth, with feeling as if too long. Pollutions or emissions without erections. Pain in the back and sacrum, worse while sitting, better by walking or lying. (*Cannab. ind., Sepia, Zinc.*)

Therapeutics.

Backache in lumbar region after seminal emissions, with weakness in legs.

COCAINUM.

Therapeutics.

Hæmoptysis. Hæmatemesis. Metrorrhagia. Hæmorrhages from the bowels. (Recommended by Bart in 2nd and 3rd dec. dil.) Chorea, paralysis agitans, Alcoholic tremors and senile trembling. (Same author; same dilution.) Should never be used in heart or lung disease. Valuable as an antidote to *Morphine*.

COCCINELLA SEPTEMPUNCTATA.

Therapeutics.

Neuralgic headache in the forehead over the right eye, which is very sensitive to touch. Hiccough and burning in the stomach, but especially pain in region of the kidneys. (*Doryphora, Cantharis.*) Good remedy in toothache from carious teeth.

COCHLEARIA ARMORACIA.

Characteristic Symptoms.

Burning and cutting at the glans penis before, during, and after micturition. Urination eight or ten times daily.

CODEINUM.

Characteristic Symptoms.

Trembling of the whole body. Short and irritating cough, often with copious mucus, sometimes purulent expectoration, worse night.

Therapeutics.

Twitching of eyelids. (*Agaricus, Crocus.*) Diabetes. Teasing cough (most dry) in phthisis pulmonum.

COFFEA TOSTA.

Characteristic Symptoms.

Aversion to open air, which aggravates the symptoms. Fear of sudden death. The face pale and anxious, waxy.

Pain in the sound right lower teeth, driving nearly crazy, *ameliorated by cold water in mouth*, returning as soon as water become warm. Fulness in epigastrium, with tension, so that the clothes must be loosened. Palpitation of the heart. Trembling of arms and legs. Feet and hands cold.

COMOCLADIA DENTATA (*Guao.*).

Characteristic Symptoms.

Redness all over the body like scarlatina. (*Rhus tox.*) *Pain in the right eye, with feeling as if larger and more protruded than the left.* The pain aggravated near a stove. (Pain ameliorated near a stove, *Rhus tox.*) The eye feels heavy, larger, painful, pressing out of head, as from a pressure on top of eyeballs, moving them downward and outward. (*Rhus tox.*) Face swollen, with eyes projecting from their sockets, and ability to see only a faint glimmer of light with the left eye. (*Rhus tox.*) The pains ameliorated by motion. (*Rhus tox.*)

Therapeutics.

Ciliary neuralgia from asthenopia and pain from other causes, especially if the eye feels large and protruding. Erysipelas faciei. Deep ulcers with hard edges. Lepra, (*Anacardium.*) *Comocladia dentata* is similar to *Rhus tox.* and *Anacardium.*

COPAIVA.

Characteristic Symptoms.

Chill and heat, then circumscribed lenticular patches, with itching and pricking; mottled appearance without desquamation. Burning in neck of bladder and in urethra. (*Canth.*) Itching of vulva. Large red blotches, with constipation and fever. (*Apis.*)

Therapeutics.

Catarrhus intestinalis, with masses of mucus; often are the stools covered with mucus, especially morning; also colic and chilliness. Dysentery, with vehement burning in anus, tenesmus and blood. (*Canth.*, *Capsic.*, *Merc. sublim.*) Catarrh of the bladder, with much pain and scanty urine every time, especially if it follows gonorrhœa. Inflammation of urethra, with much burning in pars prostratica urethræ on urinating, orificia urethræ swollen. Gleet, with mucous discharge. Irritation of the urethra and neck of bladder in old women. Constant desire to urinate. Hæmaturia. The discharge in acute gonorrhœa is yellow and purulent. Urine smells of violets (*Terebinth.*). Swelling of testicles in gonorrhœa. Bronchial catarrh and chronic bronchorrhœa, with profuse, greenish-grey, offensive expectoration. Laryngitis, with dryness, painful cough, hoarseness in morning. Exanthema like erythema, measles, or urticaria. Chronic urticaria in children. Acute urticaria, with violent itching, often after lobster or other rich food.

CORNUS CIRCINATA.

Characteristic Symptoms.

Weakness in morning on waking and rising. Pain in the pit of the stomach during dinner, with distension of abdomen from wind. These symptoms ameliorated by loose, windy and dark stool immediately after dinner. Urging to stool at 5 a.m. with bearing-down pains in abdomen. Burning in anus. Dark, thin, bilious, very offensive stools. Coldness, then flushes of heat and sweat.

Therapeutics.

Chronic malaria with jaundice, diarrhœa, and enlargement of the spleen. Aphthous stomatitis of children.

Chronic hepatitis, jaundice, face yellow and sunken. Dark, bilious, very offensive diarrhoea, with sallow complexion and sunken face. Dysentery, with burning in arms and great debility. *Cornus circinata* is similar *Chelidonium* in its hepatic symptoms and diarrhoea.

CORNUS FLORIDA.

Therapeutics.

Intermittent fever with drowsiness, the patient feels chilly, but is warm to the touch, great exhaustion, very weak in the intervals, diarrhoea, general clammy sweat. Best in chronic malaria. (*Cornuis circin.*, *Alstonia scholaris.*)

CORYDALIS FORMOSA.

Therapeutics.

Gummatica syphilitica with night pains. Syphilitic ulcers of mouth and fauces.

COTO BARK.

Therapeutics.

Chronic tubercular, watery diarrhoea, very copious and exhausting. In greater doses of great value.

COTYLEDON UMBILICUS.

Therapeutics.

Laryngeal, tracheal, and pharyngeal catarrh, with palpitation of the heart. Hysterical pains in the joints.

CUBEBA.

Characteristic Symptoms.

Urethritis with much mucus; cutting after micturition with constriction. Hæmaturia (*Terebinth.*) Prostatitis.

Therapeutics.

Obstinate otorrhoea with offensive discharge. Catarrh of the nose and throat with fetid odour and expectoration,

fetid, greenish-yellow. The mucus trickles from the nose into the throat, rawness of throat and hoarseness, (*Sinapis*). Dysentery, stools colourless, transparent, mingled with white particles like rice and much thirst. Chronic cystitis with cutting pains and constriction after micturition. Cystitis and urethritis (also in women), urination every ten minutes with smarting, tenesmi and ropy mucus. Prostatitis, also chronic, with thick, yellow gonorrhœal discharge. Leucorrhœa, offensive, acrid, yellow or green, with puritus, also in girls.

CUCURBITA PEPO.

Therapeutics.

Vomiting of pregnancy. Sea-sickness. (Recommended by missionaries in mother tincture). The seeds are very good as remedy for tape-worm.

CUMARINUM.

Therapeutics.

Intense headache in phthisis pulmonum. Asthma bronchiale.

CUNDURANGO.

Characteristic Symptom.

Painful crack in right corner of lips.

Therapeutics.

Tumours of the breast, hard, painful, with ulcers in the corners of the mouth. Stricture œsophagi with burning pains behind sternum, where the food seems to stick. Vomiting of food and indurations in left hypochondrium, with constant burning pain. Chronic gastric catarrh. Much commended here and in cancer ventriculi. Epithelioma, also externally. Old lues in productive stage (*Lorbacher*). Lupus hypertrophicus (*Lorbacher*). Also used externally 1-10 *Axungia porci* as unguentum.

*Fair usage policy applies

CURARE (*Arrow Poison*).*Therapeutics.*

Catalepsy. Paroxysms of hydrophobia (when injected under the skin). Nervous debility, especially in old people. Numbness as if a heavy weight hung to the arms, worse by using them (*e.g.*, to lift anything). Threatened paralysis of respiration, the breath stopping on falling asleep. Epilepsy. Paralysis after apoplexia. Trismus. Tetanus. Bilious vomiting in cirrhosis hepatic. Ulcera uteri with corroding, fetid discharge. *Very distressing dyspnæa of emphysema pulmonum.* Liver spots. Leprosy with following symptoms: Obstinate boils that will not heal. Dirty-looking skin. Blood oozes through the skin. Tubercles on the nose. Falling out of hair and teeth. Swelling of the lobes of ears with discharge of matter (*Kippax*).

CYPRIPIEDIUM PUBESCENS.

Therapeutics.

Sleeplessness in children, who awake in the night and are lively and full of play. Indicates often impending cerebral trouble.

DAMIANA (*Turnera aphrodisiaca*).*Therapeutics.*

Relative impotency. 10–20 drops pro die of 1st dec. dil.

DAPHNE INDICA.

Characteristic Symptom.

Sudden, lightning-like, dull jerks in different parts of the body.

DIGITALINUM.

Therapeutics.

Symptoms like the proving of *Digitalis*. Useful especially in angina pectoris, hypertrophy of the heart with

dilatation, valvular diseases with cardiac debility. Spermatorrhœa (nocturnal emissions). Epilepsia. Cardiac dropsy. Fainting attacks from sudden heart failure.

DORYPHORA DECEMLINEATA.

Characteristic Symptoms.

Difficult urination, troublesome. Pains in back and loins. Severe trembling of the limbs.

Therapeutics.

Indicated in urethritis in children, the trouble provoked by local irritation. (*Hyoscyam.*)

DRACONTIUM.

Therapeutics.

Violent attack of bronchial catarrh with first watery, burning and later yellowish, purulent discharge with great burning and rawness.

DUBOISINE (*Alkaloid of Duboisia myropoides*).

Therapeutics.

Severe pains in the eyeballs. Pupils dilated. Neuro-Retinitis. Exophthalmic goitre.

ELAPS CORALLINUS.

Therapeutics.

Violent headache first in left then in right eye, extending from forehead to occiput. Blindness. Deafness with offensive yellowish - green, bloody discharge, tinnitus aurium. Pains from nose to ears on swallowing. Chronic otorrhœa. Black cerumen in catarrh. *Sudden attacks of nightly deafness with roaring and cracking in ears.* Stoppage and stuffiness high up in nostrils, bad smell in nose, pharynx scabby, dry and cracked or covered with dry greenish-yellow membrane. Nasal bleeding. Old ozæna

and nasal catarrh (also in children), nose always stuffed up with plugs of dry mucus, pain at root of nose. (*Lycopod.*) Great sense of coldness in stomach that cold water leaves. (*Colch., Lachesis.*) Cough (also in phthisis) with hæmoptysis of black blood, *terrible pain through lungs as if they were torn out*, especially right apex pulmon. Coldness in chest after drinking. (*Colch., Laches.*) Icy-cold feet.

ELÆIS GUINEENSIS.

Therapeutics.

Scleroderma. Scleriosis (principal remedy). Elephantiasis arabum.

EPIGÆA REPENS.

Therapeutics.

Chronic cystitis with dysuria, tenesmi after micturition, muco-pus and uric-acid deposit in the urine.

EPIPHEGUS VIRGINIANA.

Therapeutics.

Sick-headache, the pains pressing in the temples from without inwards, worse on left side and viscid salivation. Caused by unusual excitement or fatigue.

ERECOTHITES HIERACIFOLIUS.

Characteristic Symptoms.

Epistaxis of bright-red blood. Hæmorrhages of similar character from the mouth, lungs, bowels, uterus, and kidneys, always attended by excitement of the circulation. (*Erigeron, Terebinth.*)

ERGOTINUM (*Wiggers*).

Therapeutics.

Kafka recommends it in uterine hæmorrhage, *dark, clotted or fluid blood coming at every motion*, also, after delivery, insufficient contraction of the womb; irregular,

feeble, or spasmodic labour pains. Profuse menstruation. Paralysis of the lower extremities from anæmia of the spinal cord. Impotency.

EUGENIA JAMBOS.

Therapeutics.

Acne, as pimples on the face, painful for some distance around. Useful in acne indurata.

EUONYMUS ATROPURPUREUS.

Therapeutics.

One of the best remedies for bilious states and bilious fevers. Cholera morbus, with profuse bilious stools, nausea and vomiting with great prostration. Increases the biliary secretion and is a good remedy in gall-stones. Albuminuria with hepatic symptoms, urine scanty, very high-coloured.

EUONYMUS EUROPÆUS.

Therapeutics.

Also a good remedy for engorgement of liver, so-called biliousness with headache, bad taste, coated tongue and constipation. Constipation with lumbago and hæmorrhoids.

EUPATORIUM AROMATICUM.

Therapeutics.

Great soreness of the mouth in infants. Vomiting of bile, pain in stomach, headache and fever.

EUPHORBIA VILLOSA SIVE SILVESTRIS.

Therapeutics.

Recommended much in rabies canina as tincture or infusum. A good remedy after the experiences of the late Dr. A. v. Kaczkowski in Lemberg. Especially good as preservative or in the beginning of the disease.

EUPION.

Characteristic Symptoms.

Intense sweat by the slightest exertion, also by night and in tuberculosis. Sensation as if the whole body were made of jelly. When the pain in the back ceases, a bland leucorrhœa runs from her.

Therapeutics.

Good remedy in uterine flexions.

FAGOPYRUM ESCULENTUM.

Characteristic Symptoms.

Dejection, irritability, want of ability for study, or to remember the matter read. Vehement pains deep in head with pressure upward as if the head should burst, often in forehead behind the eyes. Itching in and round the eyes. Heat and itching of the ears. (*Agaric. musc.*) Bad smell from the mouth. (*Puls.*) Uvula elongated, the tonsils swollen, red with sensation of excoriation. (*Phytol.*) *Appetite better by eating* (reverse *Lycopod.* and *Nux mosch.*). Sensation of emptiness in the stomach. (*Sepia.*) *Pruritus vulvæ with yellow leucorrhœa, aggravated in rest, ameliorated a little by motion* (symptoms only found connected with this remedy). Stiffness and bruised sensation in the muscles of the neck with sensation as if the nape of the neck could not support the head. Rheumatic pains of the shoulder with stinging, burning pains along the fingers, worse by motion. Sore red blotches (urticaria). Vehement itching in arms and legs, worse towards evening. Sleepiness evening with yawning and stretching, ameliorated by drawing the attention to something. Aggravation: In bed, by going upstairs, lying on the right side. Deep respiration. Scratching of the exanthema. Amelioration: From coffee, cold poultices, motion in cold air; sitting still in a warm room.

FEL TAURI DEPURATUM (*See Natrum choleiicum*).

FEL VULPI.

Characteristic Symptoms.

Constipation. Accumulation of flatus in the intestines.

FERRUM ACETICUM.

Therapeutics.

Stubborn anæmia and debility. Thin, weak and pale children, who grow tall rapidly and are easily exhausted. Hæmoptysis. Epistaxis. *Rheumatismus in the right musculus deltoideus*. Metrorrhagia. Trichinosis (*here as Tinctura ferri acetici*).

FERRUM CARBONICUM.

Therapeutics.

Congestive odontalgia in anæmic patients. Chlorosis.

FERRUM CITRICUM.

Therapeutics.

Chlorosis.

FERRUM HÆMATINATUM.

Therapeutics.

Considerable anæmia after heavy diseases, especially in young persons, who do not quite recover.

FERRUM MURIATICUM.

Therapeutics.

Pyelitis with gravel. Anæmia. Hæmoptysis with dark, clotty blood (*H. Siemsen, M.D., of Copenhagen*). After the use in low dil. or mother tincture the mouth should be rinsed with soda-water.

FERRUM PICRICUM.

Therapeutics.

Recommended by R. T. Cooper, M.D., of London, in vascular deafness.

FERRUM SULPHURICUM.

Therapeutics.

Morbus Basedowii. Chlorosis.

FORMICA RUFA.

Characteristic Symptoms.

Local application: Inflammatory redness of the skin, with itching and burning, exudation and desquamation. Urine albuminous and bloody, much urging to urination. (*Canth., Apis.*) Gout and articular rheumatism, appearing suddenly, restlessness. Pains aggravated by motion (*Bryon.*), better by pressure, right side most affected.

Therapeutics.

Rheumatic inflammation of the eyes, leucoma, pterygium, ulcers of cornea (*Hering*).

FRANCESCA UNIFLORA (*Manaca*).*Characteristic Symptoms.*

Intense headache, like a band around the head, pain in the back of the head, neck, and spine, lancinating, sticking, aching terrible all over, with great heat over the body, followed by profuse sweat, with subsidence of all the sufferings.

Therapeutics.

Recommended much in acute, sub-acute, and chronic rheumatism and pericarditis in acute rheumatism.

FUCUS VESICULOSUS.

Therapeutics.

Recommended in adipositas. Dosis: a teaspoonful three times a day in water. Good remedy in struma, 30 drops three times a day.

*Fair usage policy applies

GETTYSBURG SPRING WATER (*and Salt*).*Therapeutics.*

Contains Lithium carb. Caries of the vertebræ and of the hip-joints. Carious and other ulcers about joints. *The discharge is acrid and excoriating. (Silicea.)*

GINSENG (*Parax quinquefolium*).*Characteristic Symptoms.*

Abdomen tense, painful, with rumbling. Pain in right side of hypogastrium extending to groin.

Therapeutics.

Loud gurgling noise in regio ilio-cœcalis, dry tongue, delirium on going to sleep. Early in perityphlitis and in the local symptoms of febris typhoidea. Weakness of the genital organs and rheumatic pains after frequent pollutions.

GOSSYPIUM HERBACEUM.

Therapeutics.

Used by negroes to produce abortion. Retention of placenta after miscarriage. Tumour of the breast with hard lumps, scanty menstruation, swelling of the glands of the axilla. Morning sickness of pregnancy, with great prostration, faintness, and sensitiveness of the uterine region. Suppressed menstruation. Colica menstruationis.

GRANATUM (*Punicea granatum*).*Characteristic Symptoms.*

Salivation, watery. Nausea with *salivation*, frequent spitting, pain in stomach and abdomen, ineffectual urging to stool, sickly look, and ill-humour. Itching in anus, frequently during the day, with tickling. Oppression in chest, with sighing. Bruised pain in and between shoulders, as after a heavy load; even the clothing is

oppressive. Itching in palms, with biting sensation in various places on face and whole body, as if pimples would break out. Numerous and varied dreams, which cannot be remembered in the morning.

Therapeutics.

Jaundiced complexion, with bloated abdomen, eructations of watery fluid and vomiting, vertigo, waving before eyes, large pupils, feeling as if something moving in the stomach, palpitation, faintness. (*Gelsem.*) Kafka records a case of salivation cured with *Granatum*.

GRINDELIA ROBUSTA (*and Squarrosa*).

Therapeutics.

Asthma with profuse, tenacious expectoration, which relieves. Inability to lie down, starting up with convulsive efforts to breathe, palpitation, face livid. Cheyne-Stokes' respiration, if *the patient, when he would fall asleep, stops breathing, wakes with a start and gasps for breath.* (*Lachesis, Curare, Gelsem., Acon. ferox, Phosph.*) Fatty degeneration of the heart, with œdema pulmon. and broncho-pneumonia, must sit up to breathe. Bronchitis chronica with purulent expectoration. Cutting pain in region of the spleen extending down to the hips; spleen large and tender, sallow complexion.

GUACO (*Mikania guaco*).

Characteristic Symptoms.

Burning and aching about the spine, especially its upper part, also in the nape of neck, extending to shoulders. Dysphagia, constriction in the larynx, heaviness and difficult movement of the tongue. Headache and heat of the face. Aggravation by motion.

Therapeutics.

Spinal irritation in robust and sanguine subjects. Paralysis of the tongue and of the extremities from apoplexia. (*Naja*.) Choleric diarrhoea, with aching in sacrum and loins (*Talbot*). The provings were with doses from 5–20 drops of the mother tincture. Antidote to the bite of venomous serpents.

GUARÆA TRICHILOIDES.

Therapeutics.

Conjunctivitis, *with chemosis*, also after cataract extraction. *Lupus of an ochre-red colour*. Acne rosacea.

GYMNOCLADUS CANADENSIS.

Therapeutics.

Sore throat, with a bluish appearance or dark, livid redness. Tickling cough in scarlatina.

HEKLA LAVA.

Therapeutics.

Toothache and gum abscess from decayed teeth. Difficult teething. Neuralgic pains remaining after tooth extraction. Osteitis of lower maxilla. Exostosis, osteosarcoma, whitlow, gumboil. Relieves the pain and arrests the growth of exostosis.

HEDEOMA PULEGIOIDES.

Characteristic Symptoms.

Uterine pains and bearing down, *with great weakness in the legs*, excoriating leucorrhœa, and the ovaries sore by pressure. Tenesmi vesicales, burning pains in urethra, scanty urine, very dark like black tea.

HELIANTHUS ANNUUS.

Therapeutics.

Only ad usum 1 part to from 10–20 parts of lukewarm water. Used = *Arnica* and *Calendula* in contusions and bleeding wounds.

HEPAR SULPHURIS KALINUM.

Therapeutics.

Heinigke used this preparation instead of *Hepar sulph. calcar.* in empyema, nephritis sub-acute and chron., and pyelitis, when he desired a more powerful action on the urinary secretion.

HEPATICA TRILOBA.

Therapeutics.

Chronic pharyngeal and retronasal catarrh, with disposition to hæmorrhages. H. C. Wegge, M.D., of Copenhagen, recommends its ameliorating power in a case of pharyngeal catarrh, with profuse, serous sputa and hoarseness.

HOANG-NAN (*the bark of Strychnos Gaultheriana Pierre*).*Therapeutics.*

Useful in paralysis, eczema, prurigo, old ulcers, cancer, *leprosy* (principal remedy), and serpent bites. In prurigo and pustular eczema in parts well supplied with sebaceous glands, as the face, neck, back, and genitalia. Subdues the inflammation in furuncle and carbuncle, and promotes general nutrition. Promotes the general nutrition in constitutional syphilis and cancer of the glandular system. Leprosy is decidedly reduced; the patient becomes more vigorous, anæsthesia disappears, and the sensibility is restored. The ulcers tend to cicatrize. In this disease the doses are 5–30 drops ter die. Has a great reputation in the most malignant serpent bites.

HURA BRASILIENSIS.

Characteristic Symptoms.

Red vesicles, especially on projecting portions of bone, as the skin over the malar bone. Tension of the skin, a hide-bound feeling. (*Croton tigl.*) The vesicles are so tense that, on opening, their serous contents fairly burst forth. *Sensation as of a splinter under the thumb-nails.*

Therapeutics.

Recommended in leprosy.

HYDRANGEA ARBORESCENS.

Therapeutics.

Valuable in certain forms of "gravel," particularly useful for profuse deposits of white amorphous salts in the urine. Has arrested the tendency to formation of calculus in the bladder and relieved distress from renal calculus, with soreness over the region of the kidneys and bloody urine. (Compare with *Berberis*, *Thlaspi bursa pastoris*, and *Ocimum canum*.)

HYDROCYANICUM ACIDUM.

Characteristic Symptoms.

Disconnected talking. Wild delirium, with tossing from side to side, biting at bystanders, eyes anxious and protruding, pupils small, pulse rapid. Anxiety. Fear of imaginary troubles. Thought difficult. Coma. *Unconsciousness.* Violent stupefying headache; on bending head the brain seems to beat against it. Disturbance as if the brain were on fire. Apoplexy. Feeling as if all about him moved slowly. Pressure on right side of the forehead, extending to occiput and down nape. Pain in occiput and forehead, extending to frontal sinuses, worse on the right side. Pupils motionless or dilated and then contracted. Jaws clenched in rigid spasm. Froth before the mouth. Tongue cold. *Drink rumbles through throat*

and intestines. Noisy and agitated breathing. Pulse irregular, hardly to be felt. Cold limbs. Forehead and face cold and dry.

Aggravation : Afternoon and evening.

Amelioration : Open air, coffee.

Therapeutics.

Hysteria or epileptic convulsion, frequent violent attacks, with feeble irregular beating of the heart. Tetanus, complete loss of consciousness, cyanosis, coldness; action of heart irregular, feeble. In hysteria drinking of water seems to gurgle down the throat. Uræmic convulsions. Attacks of faintness, cyanosis, cold skin, gurgling on drinking. Collapse of *Camphor*, with sudden cessation of all discharges, cyanosis and gurgling on drinking. Gastralgia, worse when the stomach is empty, and relieved by food. Chronic dyspepsia, with vomiting of food in evening and night. (*Ferrum*.) Paralysis œsophagi, the fluid taken runs gurgling down. (*Elaps*.) Dry, spasmodic, suffocating cough, also in consumption. (*Laurocerasus*.) Recent and uncomplicated asthma, with difficult and spasmodic respiration, contraction of the throat and feelings of suffocation. (*Cuprum*.) Whooping-cough. Angina pectoris. Violent palpitation of the heart. Threatening paralysis of lungs and heart. (*Muriat. acid.*) Last stage of cholera asiatica; involuntary stools, great coldness of the whole body. Body livid blue. *Pulselessness*, rapid asphyxia. No evacuations. Urine retentions. Malignant scarlatina, the rash being livid from the very beginning.

HYDROPHOBINUM (*or Lyssin*).

Therapeutics.

Restlessness. Delirium. Rage. *Chronic headache; pressing, boring pain in the forehead, patient cannot hear*

water run. Twitching of the muscles of the face. Lock-jaw. Burning pains in the throat. Spasms of the throat from fluids. Aversion to fluids, especially water. Thirst, but cannot swallow. *Convulsions in pregnancy which occur on hearing water poured out.*

IBERIS AMARA.

Characteristic Symptoms.

Palpitation of the heart, pressure in the region of the heart, and strong stitching pains. The action of the heart intermittent. Pulse full, irregular. Fluttering contractions of the heart with small irregular pulse. Aggravation by the least motion.

Therapeutics.

Pericarditis. Myocarditis. Nervous disorders of the heart function. Dropsy with enlarged heart.

ILLICIUM ANISATUM.

Characteristic Symptom.

Purulent catarrh of the trachea with *pain on the right or left third costal cartilage.*

INDIGO.

Characteristic Symptoms.

The patient is low-spirited, sad, or timid. Feeling as if the brain was distending at the centre. Metallic taste on the tongue, with feeling of constriction in pharynx. Tearing pain four fingers' breadth over the left knee-joint, extending to one finger's breadth over the left ankle-joint, evening in sitting, ceasing by rising and walking about, returning in rest. Irritation of the bladder with mucus in urine.

*Fair usage policy applies

Therapeutics.

Recommended internally in meningitis, also the tuberculous form. Its especial use is locally. In wounds and ulcerations of the skin. Syphilitic ulcers especially fetid. Pruritus vulvæ and acrid ulcers of the uterus. Ulcus penis (chancroid) and especially phagedænic.

JACARANDA.

Therapeutics.

Jacaranda caroba. Balanorrhœa. Red chancroid or chancroid-like sores about the penis.

Jacaranda gualanai. Dr. J. F. Convers, Bogota, Columbia, South America, says: "Good remedy as mother tincture for pharyngitis acuta, with much dysphagia, no swelling of the tonsils, but fauces hot and red, great pain by swallowing, and many little vesicles in fauces. A good remedy internally and externally, when *Acon.*, *Bell.*, *Mercur.*, and *Phytol.* have given no results. Three drops every second hour. Also good in catarrhs of uterus with much leucorrhœa after many remedies have failed. Here I give three drops of the mother tincture three times a day, and two vaginal injections 1st dec. dil. in water morning and night. Third dec. dil. is best in catarrhs of the eyes with much secretion."

JALAPPA.

Characteristic Symptoms.

Several excessive, watery, often bloody, stools, with decrease of temperature and weak pulse.

Therapeutics.

Chronic diarrhœa, six or eight stools a day, dark, offensive, like gruel, with much griping and some tenesmus, sudden, watery, with a little blood, much gas; tongue smooth, glazed, and dry.

JATROPHA CURCAS.

Characteristic Symptoms.

Cramps and twitchings "calves twisted round to shins." (*Cuprum*.) Acrid feeling, gradually extending to stomach, at last causing vomiting. Distention of abdomen. Sudden urging to stool, with noises as of liquids in abdomen. (*Crot. tigl.*) *Watery stool, spurting from him* (*Crot. tigl., Elat., Gambogia*), like rice-water. Thin stool, preceded and followed by rumbling, *and, at times, noise as if a bottle were emptied.* (*Crot. tigl.*) Almost pulseless. *Cramps in calves, which becomes knotted.* (*Cuprum*.) Coldness in the whole body. Amelioration by placing the hands in cold water.

Therapeutics.

Valuable for profuse, gushing, watery diarrhoea with coldness of the body and unquenchable thirst, rumbling and gurgling in abdomen, at times with vomiting of large quantities of albuminous-looking substances. (*Veratr. alb.*, but this remedy has violent pain.) Cholera asiatica with cramps, coldness, and much wind. Irritation of the bladder, violent urging to urinate, with inflammation of the whole urethra.

JUGLANS CINEREA (*cathartica*).*Characteristic Symptoms.*

Sharp, shooting pain in occiput. Jaundice (*Nux vom.*), with stitching pains about the liver, pain under the right scapula. (*Chelidon., Bryon.*) Stools yellowish-green with tenesmus and burning in anus. Eruption resembling eczema simplex with itching and pricking when heated by over-exertion. Itching and burning pustules. The itching ameliorated by scratching. Eruption resembling flush of scarlatina. The greater part of the eruptions appear on the lower extremities and sacrum.

Therapeutics.

Occipital headache. Angina pectoris, with suffocative pain behind sternum, aggravated especially by walking, and has to stand still. Scarlatina. Eczema. Herpes circinatus. Impetigo. Lichen. Erysipelas. Erythema nodosum. Ecthyma.

JUGLANS REGIA (*Nux juglans*).*Characteristic Symptoms.*

Occipital headache with sharp shooting pains. Menses early, black, pitch-like coagula.

Therapeutics.

Comedones and acne of the face. Crusta lactea or tinea favosa with soreness on and behind the ears. (*Graphites.*) Scalp red and violent itch at night. Scabs on the arms and in the axilla. (*Arsen. jodat.*)

KALI ARSENICOSUM.

Characteristic Symptoms and Therapeutics.

Chronic eczema, dry or moist; skin of arms thicker and rougher than natural, covered with exfoliations of epidermis, itching when the patient becomes warm, lassitude, pale, sallow complexion. Tuberculous eczema over the whole body, skin red, itching worse on walking and when undressed. Psoriasis scaly and itching, with aggravation by scratching, leaving beneath the scales a very red skin. Lichen, the papulæ very numerous, and covered with whitish scabs, fissures in bend of arms and knees. Acne, large pustules, worse during menses. Ulcers, phagedænic, with deep base and upturned edges. Gouty nodosities of joints, aggravated at change of weather and then painful (*H. C. Allen in Medical Advance*).

KALI CYANATUM.

Therapeutics.

Dr. Petroz cured with this remedy (1-100 of a grain every fourth day) in two months an ulcer of the tongue with indurated, raised and knotty edges, speech difficult, and pains by speaking. Professor Margolin diagnosed: Cancerous ulcer, the basis of the tongue involved, operation impossible. After eighteen years no relapse.

KALI FERRO-CYANICUM (*Kalium ferro-cyanatum*).*Therapeutics.*

Has relieved bearing down in the uterus, pus-like leucorrhœa, profuse but not irritating; sadness even to tears. Sinking sensation at the epigastrium. Passive uterine hæmorrhage with consequent debility. The gastric sinking is connected with weakness of the heart. the beats diminished, with coldness, vertigo and numbness (*Kali carb.*). Chlorosis with puffiness, weakness of the heart, dyspnœa and tendency to dropsy. Good remedy in uterine flexions.

KALI MURIATICUM (*Kalium chloratum*).*Therapeutics.*

One of Schüssler's tissue-remedies. *White or grey coating at base of tongue. Expectoration of thick white phlegm or slime. Fibrinous exsudations. Glandular swellings. Aggravation from rich food and pastry. Parenchymatous keratitis and ulcerations. Conjunctiva not very red, the base of the ulcer dirty yellow, white mucus discharge. Kerato-iritis with pus in the anterior chamber. (Hepar Sulph.) Deafness from swelling of tuba Eustachii, a stuffy sensation and obstruction of cavum*

naso-pharyngeum with snapping noises in the ear. Follicular pharyngitis with grey or white exudation, expectoration of cheesy lumps, tonsils swollen and inflamed, grey patches in the throat. Useful in diphtheria. Dyspepsia with white tongue, pain after eating, aggravation by fatty food. Pneumonia with exudation and hepatisation. Fibrinous pleurisy. Paralysis of the right facial nerve, twitchings of the muscles of the face, aggravated by eating, speaking, or touch. Epithelioma of the mouth or of the tongue. Schüssler recommends it also for orchitis, gonorrhœa, gleet. Chancroid. Asthma. Whooping-cough with white and milky expectorations. Swollen joints with articular rheumatism. Chronic rheumatism. Eczema. Herpes.

KALI PERMANGANICUM.

Therapeutics.

Diphtheria. Throat swollen inside and outside, *the membrane horribly offensive*. Uvula œdematous. Thin, puriform nasal discharge, pain extending to nares, larynx, and ears, with constant desire to swallow, although deglutition is painful. Diuresis, obstinate constipation and great weakness. Dark-coloured, offensive diarrhœa, and with vomiting fluids in the mouth returned by the nose. Has cured desperate cases after the best remedies have failed. Three grains of the remedy in one-half glass of water, a teaspoonful every hour. Externally it is recommended as a gargle. Strength : 20 centigram. to 250 gram. of water (ʒviiij), in ulcerated sore throat.

KALI PHOSPHORICUM.

Characteristic Symptoms.

Memory weak. Loss of memory. Brain fag of literary or business men. *Intense sexual desire.*

Therapeutics.

One of Schüssler's tissue-remedies. Neurasthenia. *Muscular debility after acute diseases.* Gloomy, depressed, irritable mental state; the patient looks at everything on the gloomy side. Loss of memory and crossness in children. Melancholia, mania, hallucinations and illusions, puerperal mania, delirium tremens. *Typhoid fever*: dry tongue, brown in colour, *putrid diarrhœa*, low pulse, sordes on the teeth. Enuresis, where it is due to a paresis of the bladder, inability to retain the urine. Rheumatic lameness of the back, worse after rest on rising from a sitting position and on commencing movement. Here like *Rhus tox.* Stomacace. Scorbut. Septic hæmorrhages. Paralysis of the vocal cords. Ulcus ventriculi. Alopecia areata.

KALI SILICICUM.

Therapeutics.

Arthritic nodosities. Arthritis deformans.

KALI SULPHURICUM.

Therapeutics.

One of Schüssler's tissue-remedies. *Mucous, yellow discharges.* Aggravation evening, amelioration in the cool, open air. Recommended in psoriasis. (Confirmed by author.) Cough, great rattling of mucus on the chest, with or without much cough. The cough worse in a warm room, relieved in the cool, open air. Rheumatic pains, shifting or wandering, worse from warmth. Ophthalmia, with profuse yellow discharge. Ophthalmia neonatorum. Crusts on the eyelids. The remedy is like *Pulsat. nigr.*

KAOLIN.

Therapeutics.

Membranous croup, even when the membrane dips down deep into the trachea. Extreme soreness along the trachea and upper part of the chest, especially to touch.

KAVA KAVA (*see* PIPER METHYSTICUM).

KOLA NUT (*Sterculia acuminata*).

Therapeutics.

Best remedy in persons of drinking habits. Tuberculous diarrhoea. In alcoholic inebriation it promotes the appetite and digestion, and lessens the craving for liquor. Asthma, with much dyspnoea; is here an absolute specific, curing all cases, through its action on the nervous system. No remedy supports the strength in nervo-muscular debility so efficiently as the Kola nut. During its use there is power to endure prolonged physical exertion without taking food and without feeling fatigue. Dose: 25 centigram. to 8 gram., three times a day.

LAC CANINUM.

Characteristic Symptoms and Therapeutics.

Diphtheria, when the membrane forms on one side and goes to the other, or constantly changes sides. *The membrane mother-of-pearl* like. Syphilitic ozœna and angina, when the corners of the mouth and alœ nasi are cracked. Preventive in puerperal mastitis, when the induration is in "small lumps," worse from the least jar and in evening. Not much inflammation. (*Phytolacca*.)

*Fair usage policy applies

standing or walking. Infantile eczema, moist, offensive, yellow or grayish-white crusts, swollen even suppurating glands.

LATHYRUS SATIVUS.

Characteristic Symptoms.

Paralysis of the lower extremities with hyperæsthesia of the skin. Vertigo in standing with the eyes closed.

LIMAX ATER.

Therapeutics.

The mother tincture is recommended externally in warts and ephelides.

LIMULUS CYCLOPS.

Characteristic Symptoms.

Great exhaustion after sea-baths. Rash on the fingers, the skin as excavated or rodent.

LINARIA VULGARIS.

Characteristic Symptoms.

Enuresis with frequent painful urging to urinate, must rise at night. *The patient faints dead away without apparent cause.* Fainting of cardiac origin.

LINUM CATHARTICUM.

Therapeutics.

Laryngitis and bronchitis with difficult expectoration. Rheumatismus of the shoulder joint.

LOBELIA SYPHILITICA (*coerulea*).

Characteristic Symptom.

Pain under, not below, the inner border of the left scapula, worse after weeping.

LUPULINUM.

Therapeutics.

Burning in the urethra. Pollutiones nocturnæ. Painful erections in gonorrhœa.

MADAR (*see* CALOTROPIS).

MAGNESIA PHOSPHORICA.

Therapeutics.

One of Schüssler's tissue-remedies. *Darting, spasmodic pains* along the course of the nerves regularly each night, relieved by warmth and pressure, aggravated by slight touching. *Colicky pains ameliorated by bending double (Colocynthis)* and by application of warmth; with the pain there is belching of gas *without relief*. Spasms of the eyelids or facial muscles, hiccough and spasms in teething children, spasmodic retention of urine and dysmenorrhœa. Amelioration from heat. Spasmodic cough, in paroxysms and dry. Whooping-cough, worse at night and by lying down. Rheumatismus articulorum. Paralyse, convulsions, stiffness of the limbs, clenched fingers, thumbs drawn in. Chorea, writer's, piano- or violin-player's cramps. The patients are exhausted.

MAGNESIA SULPHURICA.

Characteristic Symptoms.

Heaviness in the head on rising in the morning, disappears after one hour. Frequent eructations with taste as of bad eggs.

MAGNOLIA GRANDIFLORA.

Characteristic Symptoms.

Stiffness in different parts of the body from slightest exposure to draught of damp air, ameliorated in dry weather. Repugnance to every occupation. Vertigo,

beginning with blurred sight. Emptiness in stomach with general lassitude, vertigo, and nausea. Suffocation when walking fast or lying on the left side. Rheumatic stitches in right clavicle and in the right side of the chest, then in heart with fear of death and general coolness, aggravated by lying on the left side and by deep breathing. Sharp erratic or rheumatic pains in the extremities.

Therapeutics.

Pains in different parts, worse in joints, constantly changing place. (*Puls.*) Rheumatic pains in clavicles. Vertigo, palpitation of heart, suffocation, numbness of the left upper limb. Valvular diseases of the heart, dyspnoea from pain in the heart and fear of death. Endocarditis, articular rheumatism and crampy pain in heart alternating with lancinations. Pericarditis and cardiac hypertrophy with constriction of the throat. Aortic aneurism. Angina pectoris.

MANCINELLA (*Hippomane Mancinella*).

Therapeutics.

Vesicles on the skin with an intense erythema. Water dropping from it and left on the skin produces vesicles. Scarlet fever and herpes. Delirium. Sore throat. Dysphagia from constriction in the throat and œsophagus. Burning of the eyes, worse by closing the lids. Burning pains in the stomach, with black vomiting. Stammering. Falling-off of the hair after severe and acute diseases.

MATICO.

Therapeutics.

Recommended by Kafka in gonorrhœa chron. (gleet) in 1st dil.

MEDORRHINUM.

Therapeutics.

Obstinate rheumatism, when the obstinacy is due to a latent syctic taint. Headache of exhaustion or from hard work. Results from suppressed gonorrhœa.

MEDUSA.

Therapeutics.

The effects nearly identical with those of *urtica urens*. Produces a nettle-rash.

MENISPERMUM CANADENSE.

Characteristic Symptoms.

Headache with pressing from within outward, often strong with stretching and yawning. Restlessness with disturbed and confused dreams and starting up from sleep. Sick-headache (megrin), with daylong-continued pains in forehead and temples, at times moving to occiput.

MENTHA PIPERITA.

Characteristic Symptoms.

Voice husky from reading aloud. *Cough dry*, excited or aggravated by reading aloud, speaking, exposure to cold, tobacco or any smoke, and passage of air into larynx. (*Rumex crisp.*, *Hepar sulph.*)

Therapeutics.

Bilious colic with great accumulation of gas. Cough with irritation in suprasternal fossa, aggravated by cold air. (*Rumex crisp.*) Severe pain of herpes zoster. Valuable externally in pruritus vaginæ.

MERCURIALIS PERENNIS.

Characteristic Symptoms.

Vertigo by going downstairs. Sensation of heaviness in head, as if it was pressed down from a weight, the scalp

seems light, numb, and difficult to move. Twitchings of the upper eyelids, especially left. Must rub the eyes in the night, when waking, before opening them. The eyelids heavy and dry. Epiphora. Pupils completely dilated. The air from the nose is cold. Much dryness in mouth; a piece of sugar cannot be dissolved. Chilliness in the whole body with heat in face. Wrapping up and sleep gives warmth and sweat. Most used in rheumatic diseases. All these symptoms are confirmed in practice.

MERCURIUS ACETICUS.

Characteristic Symptoms and Therapeutics.

Burning in urethra both during and outside the urination. (Confirmed in practice.) Very painful syphilitic ulcer in urethra, cured by Dr. Donner, of Stuttgart. Tinea capitis favosa on syphilitic basis. Lancinating pains in tabes syphilitica.

MERCURIUS AURATUS.

Therapeutics.

Obstinate syphilides, psoriasis palmaris and plantaris, protracted syphilitic catarrh of nose and pharynx, inflammation and suppurations of bones.

MERCURIUS BROMATUS.

Therapeutics.

Syphilitic affections of the skin, secondary, when other mercurial preparations are useless. Also externally as unguentum.

MERCURIUS CYANATUS.

Characteristic Symptoms.

Weakness, so that he cannot stand up. Swelling of salivary glands. White opalescent coat resembling super-

ficial mucous patches of syphilis, on pillars of velum palati and tonsils, then dark and gangrenous. Swallowing difficult. *Necrotic destruction of soft parts of palate and fauces.*

Therapeutics.

Valuable remedy in diphtheria with mercurial symptoms and aggravations, extreme prostration. Dark blood from the nose. Threatening collapse, small intermittent pulse, often rapid. Offensive breath. Syphilitic ulcers of pharynx and nose. Diphtheria of the larynx, croupy cough, dyspnoea. Also where the disease invades the nostrils and diphtheria in scarlatina. Best remedy in syphilitic ulcers of nose and pharynx, when perforation is threatening (*Donner*).

MERCURIUS DULCIS (*Calomel*).

Characteristic Symptoms.

Pallor of face as a corpse. The inside of the mouth filled with ulcers and black. The tongue black. Constant flow of dark putrid saliva, very offensive. Ulceration of the throat with dysphagia. Tenesmi rectales. Dysentery, small stools of *mucus and blood, covered with bile*. Watery, dark green stool.

Therapeutics

Scrofulous ophthalmia, ulceration of cornea. *Blepharitis chron., also syphilit.* Good remedy in catarrh of tuba Eustachii and middle ear. Diarrhoea of infants with scarcely any tenesmus, grass-green excoriating stools, enlargement of the liver and other *Mercury* symptoms. Balanitis. Balanopostheitis. Ulcus phagedænicum. Mucous patches. Maculous syphilides. Prostatitis acuta. Syphilitic ulcers of the intestines. Syphilis of the brain (*Donner*). Also externally.

MERCURIUS NITROSUS.

Therapeutics.

Pustular conjunctivitis and keratitis with burning and sticking pains, photophobia and epiphora. Mucous patches with *sticking pains*. Gonorrhœa with characteristic discharge and frequent burning, sticking itch on corona glandis and in sulcus coronarius. Also as injection. Vegetations, dry filiform pustulous syphilides. Old and malignant cases of lues. Syphilis of the nerves (*Donner*). Syphilitic diseases of the bones (*Donner*).

MERCURIUS PHOSPHORICUS.

Therapeutics.

Nervous diseases from syphilis. Also diseases of the brain, tabes, multiple sclerosis, &c. Exostoses and hyperostoses syphiliticæ. Dolores osteocopi and syphil. dolores of the joints.

MERCURIUS PRÆCIPITATUS RUBER.

Characteristic Symptoms and Therapeutics.

Gonorrhœa, when urethra is felt as a hard string. Orificium urethra blue-red with swelling of the mucous membrane. *Chancroid, when Merc. sol. or Merc. subl. gives no amelioration.* Ulcus elevatum. Phagedænic ulcer and bubo. *Ulcus induratum, deep with red, hard edges, and especially when the ulcer is spreading.* Iritis syphilitica after the pains have ceased. Pemphigus neonatorum and intertrigo syphilitica (*Author*). *Mucous patches on scrotum and by anus with or without fissures (Author).* Also externally as unguentum (1 part *Merc. præc. rub.*—50, 40 or 30 parts *Axungia porci lota*). Blepharitis ciliaris, acute and chronic. One of the best remedies in eczema, acute or chronic, with much seropurulent or purulent exudation, also externally

*Fair usage policy applies

MITCHELLA REPENS.

Therapeutics.

Chronic metritis, cervix engorged, dark red, swollen, associated with irritation at the neck of the bladder with urging to urinate. (*Eupatorium purpureum*, *Hydrocotyle*, *Vespa*, *Apis*.) Dysmenorrhœa and uterine hæmorrhage, the blood bright; dysuria. Painfulness of the muscles of the leg, ameliorated by motion.

MOMORDICA BALSAMICA.

Characteristic Symptom.

Accumulation of flatus in the splenic flexure of the colon.

MORPHINUM.

Characteristic Symptoms.

Weakness of muscular system. Mental and physical apathy. *Look unsteady. Paresis of recti interni.* Strabismus. Ptosis. Weak, foggy vision. Nausea. Pruritus. Extreme susceptibility to pain (as in cancer), so as to cause convulsions or twitchings and jerkings of the limbs.

Therapeutics.

Tympanitis. Brain feels shrunken. Piercing pain in region of heart, with difficult breathing. Icy coldness of left sole, as if it were on oil-cloth.

MOSCHUS.

Characteristic Symptoms.

Trembling of whole body. Scolding even to faintness. Pricking in body and "fidgets," preventing sleep. *Nervous.* Faintness. Vertigo, with a sensation as if falling down from a great height. Scalp is very sensitive to touch. Sounds in ears as from the report of a cannon. Urine as clear as water and copious.

Sudden sensation in upper part of larynx as if it closed upon the breath. Breathing oppressed; *must take a deep breath*. Difficult, short respiration with sticking in right of the chest, better during rest. Cramp in lung with inclination to cough, gradually increasing and making the patient desperate. Tightness of the chest; must breathe deeper and more frequently than usual. Suffocative constriction; cannot lie down and gasps for air. Palpitation of the heart. Involuntary movements of the limbs. *Coldness of the surface*. Aggravation: From cold, in the open air. Amelioration: From warmth, in a warm room.

Therapeutics.

Hysteria, faints dead away from the least excitement, even from eating. (*Asa fet.*, *Nux mosch.*) Hysterical spasm, ushered in by contraction of throat and suffocation. Globus hystericus. Syncope, great flatulence, causing fainting by pressure on the solar plexus. Incontrollable laughter. Diabetes, great thirst, profuse urination, loaded with sugar. Violent neuralgic headache, with feeling of coldness, aggravated by open air, relieved by warmth of the room. Spasmodic nervous hiccough. (Best remedy.) Suppressed menses, with hysterical spasms, choking in throat, fainting. Also too early and too profuse menses, with intolerable itching of the genitalia. Violent sexual desire, with intolerable titillation in the genital organs, in both male and female. Laryngismus stridulus, with crowing inspiration, attacks excited by eating or laughing. Spasmodic constriction of the larynx and chest, and sense of impending suffocation are associated with many diseases. Spasmodic asthma, with violent cough, much mucus in the chest, great rattling and constriction of chest. Threatening paralysis

of the lungs, with great collection of mucus and difficult expectoration. Angina pectoris, with constant desire to take a long breath. Whooping-cough, with suffocation, and rattling of mucus. Extreme palpitation of heart, with dyspnoea and deathly anxiety.

MUREX PURPUREUS.

Characteristic Symptoms.

Sinking, or "all-gone" feeling in the epigastrium. (Sepia.) Menses profuse. Frequent need to urinate during night. Urine colourless. (Compare Kreosot.) Venereal desire renewed by the slightest touch. Feeling as though something was pressing on a sore spot in the pelvis. Sharp pain from the right side of uterus to left mamma. Leucorrhœa green or bloody. Consciousness of a womb. (Helonias.) Nervous, lively, and affectionate women are most adapted to the remedy.

Therapeutics.

Polyuria worse night, urine also fetid, with the odour of Valerian. Prolapsus uteri, with pressure and bearing-down pains, and sharp pain extending upward to the breasts. *Patient keeps the legs tightly crossed to relieve the protrusion.* Chronic metritis, after miscarriage or labour with pain from uterus to mamma, as above described. Subinvolution of uterus after confinement, with pressure on rectum, hæmorrhoids, greenish-yellow leucorrhœa, and weariness in the loins. *Nymphomania. (Lilium, Platina, Hyoscyamus.)* Two cases of this disease, very obstinate, cured by the late R. Müller, M.D., of Copenhagen. Large cyst from left ovary, situated in fossa Douglasii, after secretion of very limpid fluid through vagina. Spongy growths on the orificium uteri externum. Benign tumours in the breast (two cases cured by author). The remedy most resembles *Sepia*.

MYGALE LASIODORA.

Characteristic Symptoms.

Twitchings of the facial muscles. Mouth and eyes open in rapid succession, irregular convulsive movements of one side of the body, most right; the head often jerked to one side. The words are jerked out. When the hand is put to the face, it is arrested midway, and jerked down. The movements cease during sleep (reverse *Zizia*), return as violent in the morning. Unsteady gait. Constant motion of the whole body, also in sitting. Violent erections of the penis, which is curved, and causes much pain.

Therapeutics.

Chorea and chorda.

MYOSOTIS ARVENSIS.

Therapeutics.

Phthisis pulmonum, with copious purulent sputa, emaciation, and night sweat.

MYRISTICA SEBIFERA.

Therapeutics.

The main remedy in elephantiasis arabum (*Kippax*).

MYRTUS COMMUNIS.

Characteristic Symptoms.

Stitching pain in the left breast, running through to the shoulder blade, often in consumptives. (Compare *Anisum stellat.*, *Pix liquida*, and *Theridion*.)

NAPHTHALINE.

Characteristic Symptoms.

Violent desire to urinate, reddening and tumefaction of orificium urethræ externum, and œdema of prepuce.

Therapeutics.

Hay fever, inveterate cases; sneezing, eyes inflamed and painful, head hot. Spasmodic bronchitis and asthma, relieved in open air, fulness in the frontal region, soreness in the chest and stomach, has to loosen the clothing. Emphysema pulmonum, with great dyspnoea and sighing inspiration, better by violent motion. Whooping-cough, with long-continued paroxysms, inspiration almost impossible. Gonorrhoea after the acute stage has ceased.

Naphthaline is of great value in phthisis pulmon., especially in first and second stage (many cures herewith).

NATRUM CHLORATUM (or *hypochlorosum*; *Labarraques Solution*).

Characteristic Symptoms.

Bearing down in uterus, which feels as if opened and shut. Feeling as if the womb was pushed up, when she sits down. (*Ferrum iodat.*) *Vertigo to falling, with aching across the forehead*, and uterine bearing down. Swimming feeling, as if the top of the cranium were about to float off. *Drowsiness after meals.* Confirmed in practice.

Therapeutics.

Recommended by Dr. R. T. Cooper, of London, in congested and atonic states of uterus and its ligaments, with accompanying pains about the chest and hepatic disorders. Chronic catarrhal diseases of the ear (especially middle ear) in children. He considers the remedy best suited to "*flabby, debilitated, hydrogenic constitutions,*" on which it has a general, bracing influence. *Vertigo caduca*, with aching across the forehead.

NATRUM CHOLEINICUM (*Fel tauri depuratum*).*Therapeutics.*

Is regarded as the best preparation of the *Natrum* salts. Constipation. Accumulation of flatus in the intestines. Recommended by *Natrum* (mur. or other preparations) symptoms in chronic gastric catarrh, chron. intestinal catarrh, with constipation and accumulation of flatus, typhlitis, icterus catarrhalis, gall-stone colic, cirrhosis hepatis also with ascites, vertigo from gastric complaints, diabetes mellit.

NATRUM IODATUM.

Therapeutics.

Indicated by *Natrum* (mur. and other preparations) symptoms in Pharyngitis chron. Coryza and laryngitis chron.

NATRUM NITRICUM.

Therapeutics.

Is in the school of Rademacher the same as *Aconitum* in homœopathy; a remedy in inflammations. Especially recommended in laryngo - tracheitis and croup, acute pneumonia, pericarditis, compensatory diseases of the heart, hæmaturia, acute rheumatismus articularis, morb. maculos. Werlhoffii, catarrhal and croupous inflammations, hemorrhages from different organs; meningitis, morb. Brightii, conjunctivitis, keratitis, choreoiditis, morb. Basedowii.

NATRUM PHOSPHORICUM.

Characteristic Symptoms and Therapeutics.

One of Schüssler's tissue-remedies. *Acid condition of the system.* Diabetes. Bitter taste in the mouth. *Thick, yellow coating on the palate and the back part of the mouth.* Sour risings, vomiting of sour fluids, with pain

in the stomach, and great flatulence. Diarrhoea, the stools sour-smelling, greenish, *mucous*, excoriating the anus. Intestinal worms, either long or thread-worms, acid condition, picking at the nose, squinting, twitchings of the facial muscles. Ophthalmia, with yellow, creamy discharge, also scrofulous. Naso-pharyngeal catarrh, with thick yellow mucus. Seminal emissions, followed by *weakness of the back, trembling of the knees and legs, as though they would give way, when walking.* Pyelitis, with phosphor acid sediment. Arthritis. (Podagra.) (Schüssler.)

NATRUM SELENICUM.

Therapeutics.

Recommended by Meyhoffer in cases of laryngeal phthisis, with expectoration of small lumps of bloody mucus and slight hoarseness. Best suited to the early stage of the disease.

NATRUM SILICICUM.

Therapeutics.

Haemophilia. Tuberculosis pulmon. Arthritis chron. Osteomalacia. Scrofulous bone affections.

NICCOLUM METALLICUM (*or carbonicum*).

Characteristic Symptoms.

Sour stinking water oozes from all molar teeth (jaw-teeth) by sucking on them. Thirst and intense hiccough evening. "*Gone,*" *empty feeling in the epigastrium, without desire for food.*

NICOTINUM.

Characteristic Symptoms.

Head drawn back, with rigidity of muscles of neck and back. Contractions of eyelids and muscoli masseter. Hissing respiration from spasm of laryngeal and bronchial muscles. Alternate tonic and clonic spasms, followed by

*Fair usage policy applies

acid diathesis, with large deposits of red sand, especially if the patient often had pain in the ureters. Cramping pains in the kidneys. Also discharge of large quantities of bloody or thick purulent urine.

OLEUM JECORIS ASELLI.

Characteristic Symptoms.

Emaciation. Lassitude of the whole system. Hacking, tickling cough, especially at night, dry, or with slimy mucous expectoration. *Sharp stitching pains here and there through the chest. Burning pains in spots in some one portion of the chest.* Appetite lost. Discharge of mucus from ~~urethra~~ *morning with burning. Chill running down the back, hoarseness and soreness through the chest.* Hands dry and parched. *Fever towards evening, with burning of the palms of the hands.*

Therapeutics.

Debility. Scrofulosis. Phthisis and tuberculosis. Scrofulous ulcers. Incontinence of urine. Chronic rheumatism (in this disease first used). Affections of the bones in scrofulous subjects, especially the extremities of the bones. Caries. Necrosis. Fistulous ulcers, bleeding easily (*Phosph.*), with flocculent pus.

OLEUM MYRISTICÆ (*from Nux moschata*).

Therapeutics.

Dr. Molson recommends this remedy in furunculus and furunculosis (here also preservative). Panaritium. Poisonous ulcers. Formation of pus. Internally 2nd dec. dil. 5 guttæ pro dosi. Externally the pure oil. Dr. Galley Blackley recommends *Oleum myrist.* and *Oleum ricini cum Spir. vini* in seborrhæic pityriasis in old people to remove the crusts especially by falling out of the hairs.

OLEUM SANTALUM.

Characteristic Symptoms.

Acute gonorrhœa, burning, smarting pains, frequent desire to urinate, swelling and redness of meatus urinarius, painful erections, swelling of the prepuce as if distended with water. Thick, yellowish or muco-purulent discharge. Pain deep in perinæum, stream small and passed with hesitation, sensation of a ball pressing against the urethra, pain decreased by motion, increased by standing some time. Erections feeble.

ONISCUS ASELLUS.

Characteristic Symptoms.

Face pale, expression wild. Permanent vomiting. Very severe colic with meteorismus and distension of abdomen. Tenesmi vesicales and rectales without stool and urine. Cutting burning in urethra, with considerable bodily uneasiness.

ONONIS SPINOSA.

Therapeutics.

Chronic nephritis.

ONOSMODIUM VIRGINIANUM.

Characteristic Symptoms.

Occipito-frontal pain, mostly left side, in morning on waking. Dull, heavy pain, pressing upward in occiput, with dizziness. (Gels., Cimicif.) Headaches caused by straining the eyes, with strained feeling in the eyes, worse reading or near vision. Pain in dorsal and lumbar regions, constant sexual excitement, severe erections, numbness and tingling in feet and legs.

OPUNTIA VULGARIS.

Characteristic Symptoms.

Diarrhœa, with nausea from stomach to bowels, feels as if the bowels were settled down in the lower abdomen. Also feeling as if diarrhœa would come. (Confirmed in practice.)

OSTRYA VIRGINICA.

Characteristic Symptoms.

Tongue yellow, coated on the root. Loss of appetite for breakfast and dinner. Frequent nausea, with dull frontal headache. (Confirmed in practice.)

Therapeutics.

Chronic cases of malarial intermittens with quinine symptoms, when it does not cure. Bilious conditions with languor, poor appetite and great prostration. Anæmia from malaria. (Good remedy.)

OXYTROPIS LAMBERTI.

Characteristic Symptoms.

Like *Lathyrus sativus* of Europe it produces congestion of the spine, and paralysis. Aggravation of any symptoms from thinking of it. Desire to be alone. Disinclination to talk or work. Stools slipping from anus like lumps of jelly. Sphincters seem relaxed. Urging to urinate always on thinking of it.

PÆONIA OFFICINALIS.

Characteristic Symptoms.

Biting, itching in anus, *the orifice seems swollen*. Sudden pasty diarrhœa, with faintness in abdomen and burning in anus after stool, then internal chilliness. *Painful ulcer, oozing offensive moisture on perineum near anus.*

Therapeutics.

Pasty diarrhœa, followed by burning in anus and internal chilliness. Hæmorrhoids, with ulceration; the anus and surrounding parts purple, covered with crusts, painful ulcers in ano; fissures of the anus, stool followed by burning and biting, exsudation of offensive moisture. (*Ratanhia*.) Abscess below the coccyx. Nightmare. (Symptom in provings, but also recommended in this affection by Dioscorides and Pliny.)

PALLADIUM.

Characteristic Symptoms.

Inclined to weep. *Aggravation of the symptoms the day following an evening's entertainment.* Pride easily wounded. Head feels as if swung backward and forward. Knife-like cutting pains in the uterus, relieved after stool. Swelling in the region of the right ovary, with shooting pains into the pelvis and bearing down; pains relieved by rubbing.

Therapeutics.

Headache across the top of the head, from one ear to the other; sensation as if the head swung backward and forward. Swelling and induration of right ovary, soreness and shooting pain from navel to breasts. Neuralgia of the right ovary, bearing down, aggravated by standing and moving, ameliorated by rubbing and lying, also with glairy mucus in the throat and glairy or jelly-like leucorrhœa. (*Platina, Podophyllum*.)

PASSIFLORA INCARNATA.

Therapeutics.

Has cured cases of tetanus in hot countries. Recommended in alcoholismus, morphinismus and sleeplessness.

In the last-named disease 10–20 guttæ of the mother tincture has given excellent results. Sleeplessness in old people (*Author*).

PAULLINIA SORBILIS (*Guarana*).

Therapeutics.

Sick headache. An efficacious remedy, but must be given in large doses. Diarrhoea, green and profuse, but odourless. *Chloasmata* on the temples and arms.

PENTHORUM SEDOIDES.

Characteristic Symptoms and Therapeutics.

Useful in the incipiency of coryza and often taken in early time prophylacticum in coryza. With the coryza rawness in nose and throat. Constant wet feeling in the nose but without coryza. Later thick purulent discharge as in *Pulsatilla*.

PHELLANDRIUM AQUATICUM.

Characteristic Symptoms.

Heaviness and pain, as if a hard body or weight were upon vertex, with aching and burning in the temples and above the eyes, which are burning and congested. Lachrymation. Can bear neither light nor sound. The headache involves the nerves going to the eye, and there is a crushing feeling on vertex. Menses flowing profusely only in morning and evening. Sticking through right mamma near sternum, extending to back near shoulders, aggravated by breathing.

Therapeutics.

Neuralgic headache, also with inflammation of the eyes. Bronchitis and emphysema with rapid respiration, cough compelling to sit up day and night. A very good remedy

for the extremely offensive expectoration in the last stage of phthisis. Pain in the milk ducts, intolerable between the acts of nursing.

PHLORIDZIN.

Therapeutics.

Recommended in 3rd dec. trit. in diabetes mellitus

PICHI (*Fabiana imbricata*).

Therapeutics.

Uric acid diathesis with very excoriating urine and urinary calculi. Inflammation of the whole urethral tract, must often pass the urine, burning pains and vehement vesical tenesmus after urination. Acute or chronic cystitis, caused from gravel, with painful urination and much mucus and pus. Sub-acute or chronic gonorrhœa, painful urination, prostatitis, much mucus and pus. (1-20 drop doses of the fluid extract.)

PICROTOXINUM (*Alkaloid from Cocculus*).

Therapeutics.

Recommended in night-sweats of consumptives, taken at bedtime.

PILOCARPINUM (*Alkaloid from Jaborandi*).

Therapeutics.

Recommended in sweat during different diseases, also night-sweats of consumptives, and here I have for many years used it in 3rd. dec. dil. 5 drops pro dosi with great success (*Author*).

PINUS SYLVESTRIS.

Therapeutics.

Emaciation of the lower extremities, weakness of the ankles and tardiness in learning to walk in scrofulous and

rhachitic children. Also externally used as the mother tincture.

PIPER METHYSTICUM (*Kava Kava*).

Characteristic Symptoms.

Buoyancy and exaltation of the mind, fulness of the vessels of the brain, followed by brain fag and dull aching in the head. *Amelioration of pains for a time from diverting of the attention. Very sensitive to external impressions. Urging to stool every evening. Skin covered as in leprosy with large scales. Fall of scales leaves white spots, which often ulcerate. Restless desire in pains to change the position.*

Therapeutics.

Hyperæmia cerebri with psychic exaltation and later depression. Toothache with enlarged tonsils, earache, restlessness. The pains involve the whole side of the face, often from taking cold. Better when amused. Colic, neuralgic, with great restlessness; changes the position. Passage of uric acid. Acute gonorrhœa, spasmodic cystitis, urethritis, orchitis and catarrhal affections of all mucous membranes. The flow of urine is increased, the burning pain during micturition is relieved and the discharge gets less and less. Also in gleet. Bright's disease with much albumen, casts, and hydrops, also with involved heart. In acute gonorrhœa 20 drop doses four times a day in a full goblet of water is recommended. Eczema. Leprosy.

PIX LIQVIDA (*Aqua picis or Tar*).

Characteristic Symptoms.

Pain on a spot at the third left costal cartilage, where it joins with the rib. (Anisum stellat. Myrtus commun.

PLATINA MURIATICA.

Therapeutics.

Syphilitic headache, occipital, violent, after *Iodide of Potassium* fails to cure. Syphilitic affections of the throat with salivation and dysphagia. Syphilitic skin affections, papulous and vesiculous. Ostealgia from syphilis. Caries of the bones, particularly nasal bones and tarsus, also syphilitic rheumatism. Especially after *Mercury* and *Aurum*. Enuresis nocturna. Chronic gonorrhœa with mucous discharge. Acne. Comedones. Condylomata (also mucous patches).

PLECTRANTHUS FRUCTICOSUS.

Therapeutics.

Paralysis spinalis spastica.

PLUMBUM JODATUM.

Therapeutics.

Arteriosclerosis, pellagra, paralyse, atrophix.

POLYGONUM AVICULARE.

Therapeutics.

Recommended in phthisis pulmon. 5-10 drops ter of the mother tincture.

POLYGONUM PUNCTATUM.

Therapeutics.

Amenorrhœa in young girls after *Pulsatilla*. (Good remedy).

POLYPORUS OFFICINALIS.

Characteristic Symptoms.

Aching in all large joints. Head feels light and hollow. Loss of appetite with an "all-gone" feeling in the epigastrium. Burning distress in the stomach with very severe

dragging pains in the liver. Stools of water, bile, mucus, and black fæcal matter, followed by great faintness, closely resembling *Leptandra*. Lienteria. Urine scanty, high-coloured. Great prostration. Disposition to yawn and stretch. Aggravation: damp, cold weather. Amelioration: warm, dry air.

Therapeutics.

Useful in endemic intermittent fever, quotidian or tertian, with rush of blood to the head, vertigo, prickly sensation in the face, which is hot and flushed, perspiration not profuse, during the apyrexia jaundice, frontal headache and constipation. Phthisis, with copious night-sweats and watery diarrhœa (five-grain doses).

POPULUS CANDICANS.

Characteristic Symptoms.

Insensibility of surface, worse back and abdomen; rubbing and pounding borne without pain and insisted upon for the sake of warmth. Finger-ends thickened, horny, insensible to pinching and pricking.

POPULUS TREMULOIDES.

Therapeutics.

Catarrh of the bladder; urine contains much mucus and pus, severe tenesmus, especially in old people. Good remedy in tenesmus vesicales after laparotomy or ovariectomy. Urethritis, micturition painful, scalding, especially during pregnancy.

POTHOS FŒTIDUS.

Characteristic Symptoms.

Sudden feeling of anguish with troublesome respiration and sweat (confirmed in practice). Asthma, worse from any inhalation of dust.

PRUNUS SPINOSA.

Characteristic Symptoms.

Pressing-asunder pain, so that he almost lost his thoughts. Pain beneath skull as if the skull would be pressed outward by a plug. *Shooting from right frontal bone through brain and out at occiput.* Pressure outward beneath upper part of right temporal bone, worse by pressure. *Pain in right ball of the eye as if inner part of eye would be torn out.* Piercing pain as if teeth would be taken out. Wrenching pain in molars when anything warm is taken into mouth. Ascites with loss of appetite, scanty micturition, hard nodular stool with rectal pain. Cramp-like pain as if an angular body pressed inwards in right side of rectum an inch above anus. Burning in anus as from salt in a wound, after slimy diarrhoea. *Tenesmus of bladder*, every quarter of an hour. Burning pains with ineffectual efforts to urination, so that he must bend up. Relief by passing urine, but there remains sticking in glans, which causes spasm of urethra, with tenesmus rectalis. Hurriedly impelled to urinate; *the urine seems to pass into glans and then to return and cause pain in urethra.* *Respiration anxious, short, wheezing* when walking. Oppression of the chest, obliging deep breathing with anxiety.

Therapeutics.

Ciliary neuralgia, severe pain in the right eyeball, as if the eye would burst, shooting like lightning through the brain, to the occiput, sometimes involving all the parts around the eye. Irido-choroiditis. Irido-cyclitis. Opacity of the vitreous humour. Neuralgic dysuria. Respiratory and cardiac complaints, dyspnoea, sense of suffocation. (*Laurocerasus*.) Cardiac dropsy. Hypertrophia cordis with oedema pedum. Herpes zoster and angina pectoris. (Good remedy.)

PSORINUM.

Characteristic Symptoms.

Looks pale, exhausted and thin. *Debility independent of any organic disease. Offensive odour from the body. Defective reaction. (Sulph., Cupr., Carbo veg., Lauroceras, Ambra, Valeriana, Capsic.) Profuse sweating from the least exertion. Stormy weather aggravates. Fear. Anxiety. Melancholy. Despair of recovery. Constant thoughts of dying. Intolerable itching. Headache, hammering in head. Otorrhœa with offensive pus, odour like that of rotten meat. Swelling of the upper lip. Tongue coated yellowish-white, dry. Ravenous hunger, must eat bread in middle of night. Eructations with taste of rotten eggs. Stool fluid, dark-brown, foul-smelling. Impotency. Cough, aggravated morning on waking and evening on lying down; expectoration green, mucous, nearly like matter. Expectoration difficult. Suffocation in larynx, with crawling, causing dry hacking cough. Glands swollen. Weakness of joints as if they would not hold together. Herpetic eruptions, especially on the scalp and the bends of joints with great itching, intolerable as soon as the patient becomes warm in bed. Sweat on walking with consequent debility. Takes cold easily.*

Therapeutics.

Weakness after debilitating diseases. Amœmia, with aversion to food and foul taste. Religious melancholia. Chronic headache, with inordinate appetite, sensation in occiput as of a piece of wood lying on the head. Humid eruptions on the scalp, the hair matted and with foul odour. Scrofulous ophthalmia. Stinging pains in the liver, aggravated from lying on the right side. Diarrhœa and cholera infantum with fluid, dark-brown, and fetid, watery evacuations. Chronic cough, with offensive ex-

pectoration, night-sweats. The skin is yellow, dirty and greasy with eruptions, offensive secretions. Easy perspiration. Various forms of eczema, also tinea capitis, worse in the warmth of the bed and with fetid odour. Enlarged glands. The sebaceous glands secrete in excess. Indolent ulcers on the legs, *slow to heal*. Antidote: *Coffea*.

PULSATILLA NUTTALLIANA.

Characteristic Symptoms.

The tongue yellow, coated. On waking, dry pappy taste in mouth, as if the tongue was thickly coated. The symptoms are otherwise complete as in the proving of *Pulsatilla nigricans*. *Pulsatilla nuttalliana* has aggravation of the symptoms during walking, *Pulsatilla nigricans* has aggravation of the symptoms in the beginning of motion and amelioration during continued motion.

QVEBRACHO.

Therapeutics.

Asthma and bronchial catarrh with great dyspnoea. Also in valvular diseases of the heart with dropsy and œdema pulmonum. Is called "Digitalis of the lungs." Dr. E. M. Hale gives 10 drop doses of the mother tincture.

RANUNCULUS ACRIS.

Characteristic Symptoms.

Pains in the lumbar muscles and in the joints by bending and turning the body. Confirmed in practice.

RANUNCULUS SCCELERATUS.

Characteristic Symptoms.

Gnawing in one spot in left vertex. *Denuded patches on the tongue, the remainder of the organ being coated, also mapped tongue.* (*Natr. mur., Arsen., Rhus tox., Taraxac.*)

Sensation of a plug lodged behind umbilicus. Frequent sensation as if diarrhoea would set in. Pressure as with a dull instrument behind right false ribs, aggravated by deep inspiration. Sudden sticking in right great toe, passing into burning. *Vesicular eruption with tendency to form large blisters. Exudation of an acrid discharge, which makes the surrounding parts sore.* Broken slumber after midnight, constant tossing about, frightful anxious dreams about corpses, serpents, battles, &c. The remedy has more irritating properties than *Ranunculus bulbos*.

Therapeutics.

Fluent coryza with sneezing; burning micturition. Stomacace, diphtheria and typhoid fever with the characteristic symptoms of the tongue. Corns on the toes with burning and soreness, especially painful when the feet hang down. Vesicular eruptions with characteristic symptoms.

RAPHANUS SATIVUS.

Characteristic Symptoms.

Distension of abdomen, tympanitic. Abdomen *hard*, as if filled with air. *Great flatulence. No flatus emitted upward or downward.* Stool liquid, yellowish brown, frothy, profuse.

Therapeutics.

Neuralgic toothache, pains shooting, pulsating in evening, also during early period in pregnancy. Pains aggravated by lying down, ameliorated by walking about. Tympanitis or accumulation of flatus. Diarrhoea, thin, brown, frothy, yellowish, with colic and prominence of the intestines like pads, and *no flatus emitted upward or downward.* Chronic diarrhoea, green, liquid, bloody stools, no emission of flatus. Pemphigus without inflammation or pain. Seborrhoea with greasy skin.

RATANHIA.

Characteristic Symptoms.

Sensation as of a skin before the eyes. *Violent hiccough, so that stomach is painful.* Anus oozing. Burning pains before and after diarrhœa. *Dry heat at the anus with sudden stitches as with a penknife.* Stools are forced with great effort, protrusion of hæmorrhoids. *Anus aches and burns for hours after stool. Rectum seems as if full of pounded glass. Constriction of anus.*

Therapeutics.

Different cases of pterygium cured. Toothache also in carious teeth at night, compelling the patient to get up and walk about. Also in the first months of pregnancy. (*Magnes. carb.*) (Dr. A. Lippe.) Fissure of the anus, with great constriction, excruciating pains after stool, burning like fire, temporarily relieved by cold water. Hæmorrhoids, with burning pains like fire. Thin fetid diarrhœa, with bloody stools and burning like fire in the anus. Fissure of nipples in nursing women.

RHUS AROMATICA.

Therapeutics.

Diabetes. (Important remedy, recommended from 10 drops to a teaspoonful of the mother tincture pro dosi.) Incontinence of urine (enuresis), diurnal and nocturnal. (Great remedy, recommended in 10-drop doses of the mother tincture.) Hæmaturia, with general debility. Cystitis with violent pain by urination.

RHUS GLABRA.

Therapeutics.

Occipital headache. Epistaxis, proceeding from the left side.

*Fair usage policy applies

tremities. Increases the quantity of milk in nursing women. (*Urtica ur.*, *Agnus cast.*) Counteracted by *Bryonia* and *Nux vom.*

ROSA DAMASCENA.

Therapeutics.

Hay fever. Useful in the beginning of rose cold, when the Eustachian tube is involved, hardness of hearing, and tinnitus aurium.

SABAL SERRULATA (*Saw Palmetto*).

Therapeutics.

Cystitis, with difficult urination after gonorrhœa and gleet. Sub-acute and chronic prostatitis with painful or difficult urination. Atrophy of the prostate. Best remedy in hypertrophia prostatæ in old men, where the urinary function is greatly interfered with. (Dose here: one teaspoonful at a dose, morning and night.) Wasting of the testes and loss of sexual power. Sub-acute and chronic epididymitis; coitus very painful at the time of emission (15 drops ter die). Atrophy of mammæ and uterus. Catarrh of the nose, chronic bronchitis and phthisis pulmonum with copious expectoration. Mal-nutrition with great emaciation. In the four last-named diseases the oil, 15–30 drops ter, is the best preparation.

SACCHARUM OFFICINALE (*Cane-sugar*).

Characteristic Symptoms.

Children who are large-limbed, fat and bloated. The child is dainty and capricious, cross, whining, wants only little “tit-bits,” no substantial food. Opacity of the cornea.

SALICYLICUM ACIDUM.

Characteristic Symptoms.

Vertigo. Confusion in head on rising suddenly after lying down a long time. Roaring and ringing in ears. Deafness. Rheumatic pains in different places, often changing locality. When the pain appears in one part it disappears in the previous one. Soreness to touch and on motion. Exanthema bullosum. Pimples, vesicles or pustules, itching. Ameliorated by scratching and in bed.

Therapeutics.

Vertigo, tendency to fall to the left side, surrounding objects seem to fall to the right; headache. Menière's disease. Simple deafness with tinnitus. Canker sores (aphthæ), with burning soreness and foetid breath. Dyspepsia with much flatulence, hot, sour belching. Indigestion, with headache and putrid fermentation. Dysentery, stools like green frog's spawn. Putrid diarrhœa in children. Sciatica, with burning pain, worse night. Acute articular inflammatory rheumatism, aggravated by touch and motion, profuse sweat. (Recommended in doses from 10–25 centigram. or 1–3 dec. trit.) Rheumatic inflammations with serous effusions. Diabetes.

SALVIA OFFICINALIS.

Therapeutics.

Prepared from fresh leaves and flower-tips it is much recommended as an essence (20–30–40 drops in a tablespoonful water) in suffocating, tickling cough of phthisis pulmon. Night-sweat in the same disease.

SANGUINARINA NITRATE.

Characteristic Symptoms.

Sensation as if he has taken horse-radish, causing gush of tears from eyes, which soon become blurred as from

a film of mucus. Dryness and burning of nostrils, throat and bronchi, lachrymation, watery mucus from nostrils, pressure, heat and fulness in forehead, extending to root of the nose. The nostrils are plugged with thick yellowish bloody mucus. *Sneezing*, with trickling of watery mucus from the nose. Short, hacking cough with expectoration of thick yellow sweet mucus. Poor sleep *on account of pressure behind the centre of sternum.*

Therapeutics.

Used much for polypus of the nose, chronic catarrh with sneezing and burning, laryngitis, hoarseness, dry hacking cough. Rawness and soreness in nares posteriores with hawking of thick yellow bloody mucus.

SANICULA.

(The water of the Sanicula Springs in Ottawa, Illinois.)

Is proved in homœopathic manner by Dr. Sherbino. The water contains especially Sodium chloride, Calcium chloride, Magnesium chloride, &c.

Characteristic Symptoms.

Profuse sweat on occiput and in the nape of the neck during sleep. Great photophobia. Lachrymation of the eyes in cold air or after cold applied externally. Thick, ropy, tenacious mucus from the throat. (*Kali bichrom.*, *Hydrastis.*) Stools large and painful enough to rupture the sphincter with *pain in the whole perinæum.*

Therapeutics.

Ophthalmia scrofulosa. Sea-sickness. (Good remedy.) Enuresis nocturna. (Many cases cured.) Constipation.

SANTONINUM.

Therapeutics.

Hyperæsthesia and hyperæmia of the eyes with sudden dimness of the sight, especially in seamstresses. Amblyopia.

SILPHION CYRENAICUM.

Therapeutics.

Phthisis pulmonum with great cavernes, incessant cough day and night, nummular expectoration, profuse night-sweats, great emaciation, anorexia. I have seen in two cases amelioration with this remedy, 1st dil. (centes.) in the last stage (*Author*).

SILPHIUM LACINIATUM.

Therapeutics.

Recommended in asthma bronchiale catarrhal or nervosum (all forms of asthma). Chronic bronchitis with large quantities of stringy, frothy, light-coloured mucus.

SINAPIS NIGRA.

Characteristic Symptoms.

Stoppage of the left nostril all day or in afternoon and evening. (Lycopod. right nostril.) Scanty acrid discharge from nares anteriores.

Therapeutics.

Hay fever, mucous membrane of the nose is dry and hot, no discharge. Symptoms worse afternoon and evening. Acute coryza with thin, watery, excoriating discharge, lachrymation, sneezing, hacking cough, ameliorated by lying down. Acute pharyngitis, feels scalded, hot, inflamed. Loud coughing spells with barking expiration, heard at a great distance.

SOLANUM NIGRUM.

Characteristic Symptoms and Therapeutics.

Complete cessation of the mental faculties with vertigo and terrible headache. Tetanic stiffness of the whole body. (Confirmed in practice.) Used with success in

ergotismus, in which there were tetanic spasms with stiffness of the whole body and mania (delirium furi-bundum).

SOLANUM VESICARIUM (*Physalis alkekengi*).

Therapeutics.

Recommended in paralysis nervi facialis.

SOLANINUM ACETICUM.

Therapeutics.

Threatening paralysis of the lungs in bronchitis of old people and young children. In old people prolonged cough to expel the phlegm.

SPARTEINUM SULPHURICUM.

(*Alkaloid from Spartium scoparium.*)

Therapeutics.

Useful in functional cardiac diseases with irregular heart action. (*Digitalis.*) Organic valvular diseases of the heart with weak irregular pulse and with dropsy. A great remedy in albuminuria from organic heart diseases or acute nephritis. Dyspepsia with irregular pulse, angina pectoris, much depressed mind and great accumulation of gas in the gastro-intestinal canal.

SPIRANTHES AUCTUMNALIS.

Therapeutics.

Yawning spasm and day-sleepiness. Milk-flow in nursing women. Lumbago and rheumatismus of the shoulder. Colic with bilious diarrhoea.

SPIRÆA ULMARIA.

Therapeutics.

Recommended in hydrophobia. Epilepsia. Eclampsia.

STIBIUM ARSENICOSUM (*see* **ANTIMONIUM ARSENITUM**).

STIGMATA MAIDIS (*Fluid extract*).*Therapeutics.*

Renal lithiasis with nephritic colic and discharge of small calculi, red sand, and blood. Chronic pyelitis from calculi. Chronic retention of urine, with great tenesmus after urination. Suppression of the urine, with lack of solids, low specific gravity. Vesical catarrh, tenesmus colli vesicæ, ammonial urine, much mucus. Chronic gonorrhœa, the prostate involved, painful urination. Organic heart diseases, much œdema of the lower extremities and scanty urination. (Confirmed by Author.) (In the two last-named diseases 20 drops pro dosi.)

STRONTIANA CARBONICA.

Characteristic Symptoms.

Headache, coming up from the nape of the neck and spreading thence over the head; all the head-symptoms relieved by wrapping the head up warmly. (Silic., Magnes. mur.) Flushes in the face, violent pulsation of arteries. Neuralgia, especially of the supra-orbital nerve, pains increase and decrease slowly (*Stann., Plat.*). Diarrhœa, worse at night, *the patient is scarcely off the vessel before he has to return. Better towards morning.* Sycotic eruption, moist, itching, and burning. *Amelioration in open air, especially warm sunshine.*

Therapeutics.

Threatening apoplexy with violent congestion of the head, red face every time the patient walks. Swelling and caries of the bones in scrofulous constitution, especially the femur, with watery diarrhœa, which recurs constantly, worse at night. Chronic sprains of the ankle-joint with œdema, after *Arnica* and *Ruta* have failed.

SULPHUR JODATUM.

Characteristic Symptoms.

Uvula and tonsils enlarged and reddened, accumulation of dark purulent mucus in windpipe, mucus removed with difficulty. In the throat feeling as if swelled. Itching on ears, nose, and in urethra. Papular eruption on the face. Erythematous breaking out on upper lip, with yellowish pustules, painful, quickly disappearing in dry scales. Boils upon anterior part of neck and in vicinity of the mouth. Arms covered with an itching rash like nettle-rash.

Therapeutics.

Thickening of the tongue remaining after parenchymatous glossitis. Hypertrophy of parotis remaining after parotitis. Hypertrophica tonsillarum chronica. Moistening chronic eczemata. Eczema rubrum with varices on the lower extremities. Barber's itch. (Good remedy.) Large and painful suppurating acne of the face in young people. Lichen planus chron. and simplex.

SUMBUL (*Ferula sumbul*).*Characteristic Symptoms.*

Intellect dull in morning, clear in evening. Mistakes in writing and summing. Choking constriction at top of gullet, constant swallowing.

Therapeutics.

Spasm of pharyngeal muscles. Asthma. Nervous palpitation. Comedones faciei.

SYMPHYTUM OFFICINALE.

Therapeutics.

Injuries to the bones. Non-union of fractures. (*Calc. phos.*) Irritable stump after amputation. Irritability of bone at point of fracture. Psoas abscess from diseases of

the vertebræ. Inflammation of the inferior maxillary bone. Traumatic periostitis. Wounds penetrating in periosteum and bones.

SYPHILINUM.

Therapeutics.

Chronic syphilitic headache. Chronic skin diseases and rheumatism in syphilitic constitutions. Dr. Donner has cured herewith syphilitic eruptions like ichthyosis of many years standing.

SYZYGIUM JAMBOLANUM.

Therapeutics.

Diabetes mellitus. (Most useful remedy.) All the symptoms are at once improved. Old ulcers of skin, probably of a diabetic foundation.

TAMUS COMMUNIS.

Therapeutics.

Recommended by Dr. J. H. Clarke, M.D., of London, externally as mother tincture in simple unbroken chilblains.

TANACETUM VULGARE.

Therapeutics.

Chorea with strange gesticulations. Affections from worms with twitchings in sleep and wakening from fright. Dysmemorrhœa with bearing-down pains, tenderness, drawing in the groins.

TARENTULA CUBENSIS.

Therapeutics.

Gangrene. Carbuncles, even sloughing, with great prostration and diarrhœa, intermittent fever of evening exacerbation. Acts magically in the most terrible burning,

stinging pains here. Bubo. Diphtheria. A purplish hue with the above-named pains is characteristic. (Compare *Laches.*, *Anthracin.*, *Silic.*) Recommended in last stage of tuberculosis pulmonum. Diphtheria, malignant type, deposit dark-coloured, fetid breath, septic fever. Typhoid fever, fetid dark stool, great prostration.

TARTARICUM ACIDUM.

Characteristic Symptoms.

Weakness in evening, can scarcely drag himself along. Tongue brown and dry. Vomiting, dark green. Many stools at night. Fæces of the colour of coffee-grounds.

TAXUS BACCATA.

Therapeutics.

Recommended in pustulous diseases of the skin, the pustules flat, large and strongly itching. Podagra. Bad-smelling night-sweats.

TEUCRIUM SCORODONIA.

Therapeutics.

Much recommended in tuberculosis or phthisis pulmonum with muco-purulent expectoration. Orchitis or epididymitis tuberculosa. Hydrops. Either in dilution or as a tea.

THALLIUM.

Characteristic Symptoms.

Trembling. Lancinations following each other with the rapidity of electric shocks in stomach and bowels. Paralysis of the lower limbs. (*Plumbum.*)

Therapeutics.

Relieves the violent pain in tabes dorsalis.

TILIA EUROPÆA.

Therapeutics.

Puerperal metritis with intense sore feeling about the uterus and bearing down with hot sweat without relief. Neuralgia faciei, first on the right, later on the left side, with veil before the eyes. Urticaria. Lichen simplex with violent itching and burning like fire after scratching.

TITANIUM.

Therapeutics.

Vertical hemiopia.

TONCA (*Dipterix odorata*).*Characteristic Symptoms.*

Tearing pains in nervus supraorbitales, with heat and throbbing pains in the head with epiphora. Also tearing pains in the hip-joint, femur, and knee-joint, especially left side.

Therapeutics.

Megrim, facial neuralgia, pains in the hip.

TRIFOLFUM PRATENSE.

Characteristic Symptoms.

Hoarseness and choking spells at night with cough. The neck is stiff, cramps in muscoli sterno-cleido-mastoidei, relieved by heat and friction.

TRIMETHYLAMINUM (*Propylaminum*).*Characteristic Symptoms and Therapeutics.*

Great pains in wrist-joints, also great restlessness, pains in the ankle-joints from standing, aggravation by the slightest movement. Recommended in acute rheumatism.

TRIOSTEUM PERFOLIATUM.

Characteristic Symptoms and Therapeutics.

Bilious headache, especially in occiput, worse by sitting up, and in the right side with nausea on rising, followed by copious vomiting (sick-headache). Influenza with aching pains all over and heat in the limbs.

TROMBIDIUM MUSCÆ DOMESTICÆ.

Characteristic Symptoms.

Griping in hypochondrium on rising with brown diarrhœic stool, which relieves the pain. After breakfast violent pains return, after which stool with tenesmi.

Therapeutics.

Dysentery with brown, thin, bloody evacuations and tenesmi. Congestion of the liver with urgent loose stools on rising from bed; during stool sharp pain in the left side, shooting downward.

TUBERCULINUM (*see* BACILLINUM).*Therapeutics.*

Tubercular meningitis, consumption, tubercular arthritis. Bright's disease. (Often recommended.)

TUSSILAGO PETASITES.

Therapeutics.

Recommended in acute or chronic gonorrhœa, yellow or white, thick discharge.

UPAS TIEUTÉ (*Arrow poison*).*Characteristic Symptoms.*

Pain in the mouth as from a splinter. Sensation of heaviness in the stomach. Violent palpitation of the heart.

Therapeutics.

Tonic spasms. Paralysis. Sexual debility. Inflamed hang-nails. Its action is contrary to that of *Curare*, the two being mutual antidotes. Herpes on the left upper lip.

URANIUM MURIATICUM.

Therapeutics.

Diabetes insipidus and mellitus.

USNEA BARBATA

Therapeutics.

Good remedy, used as the mother tincture, in headache when the pains are in the whole head or frontal head; feeling as if the temples would burst or the eyes would burst out of the sockets.

UVA URSI (*see* ARBUTINUM).*Therapeutics.*

Cystitis, with frequent urging, burning and tearing pains, tenesmus, spasm of the bladder. Much blood or tough mucus or pus in the urine. Uterine inertia during labour. Hæmorrhage from uterus (like *Secale corn*). Renal hæmaturia. Pyelitis. West Indian chyluria.

VACCININUM. VARIOLINUM.

Therapeutics.

Recommended in variola.

VESPA CRABRO.

Characteristic Symptoms.

Erysipelatous inflammation of the lid, whole side of the face painful and swollen, almost complete chemosis of conjunctiva, it being raised up on the sclerotic membrane, more than half over eye to border of the cornea, as if fatty matter were under it, caused by effusion of lymph.

extends from the liver to the shoulder and the hip. The liver reduced to its normal size and the pain removed. Good remedy in varicose veins and acute phlebitis. The veins are swollen, bordered by an area of inflammation, very sensitive to touch, *bursting pains and feeling by letting the limb hang down*, better by resting the limb on a table or other elevation.

VICUM ALBUM.

Therapeutics.

Metrorrhagia, with stitching pains in the temples, numbness of the extremities, blue rings around the sunken eyes. The blood is partly bright, partly dark and clotted. Causes uterine contractions and is a good remedy in retained placenta. Whooping-cough. (Confirmed by me in several epidemics.) Chorea. Epilepsy. Sciatica, good remedy.

WYETHIA HELENIODES.

Characteristic Symptoms.

Dryness of fauces with constant desire to clear the throat by hemming. (*Argent. nitr.*) Pricking dryness in nares posteriores, with sensation as if something were in the nasal passages; no relief from clearing. Throat feels swollen, epiglottis dry and burning, no relief of the dryness by swallowing saliva. Dysphagia.

Therapeutics.

Follicular pharyngitis (granular sore-throat), with pricking, burning, hot, and dry sensation in nares posteriores. Chronic pharyngitis, dryness (*Bell*). Constant clearing the throat; pharynx dark red, sensitive. Hoarseness in teachers and singers. (*Phosph.*) Dry asthma.

YERBA SANTA (*Eriodictyon californicum*).*Therapeutics.*

Bronchial phthisis (phthisis pituitosa), with night-sweats and emaciation. Asthma relieved by expectoration.

YUCCA FILAMENTOSA.

Characteristic Symptoms.

Biliousness, with pain going through the upper portion of the liver to the back. Yellow face, tongue yellow-coated, taking imprint of the teeth. Diarrhœic stools, yellowish brown with much bile. Erythematous redness of the skin. Burning and swelling of the prepuce, with redness of meatus urinarius.

Therapeutics.

Liver disease. Balanitis. Gonorrhœa.

ZINCUM CYANATUM.

Therapeutics.

Eclampsia infantum. Meningitis simplex and basilaris in second stage. Meningitis cerebro-spinalis. Epilepsia. Chorea. Paralysis agitans. Hysteria.

ZINCUM SULPHURICUM.

Characteristic Symptoms and Therapeutics.

Trembling and convulsions of the limbs, cramps in the arms and legs. Paralysis. Tongue paralysed. Opacities of the cornea after repeated inflammations of that membrane. Granular lids.

ZINCUM VALERIANICUM.

Therapeutics.

Recommended in stenocardia. Good remedy in hysteria, when the patients cannot sit still, or when they must keep the legs in constant motion. This symptom

is often present in old cases of uterine disease. Chronic ovarialgia; the pain shoots down the limb of the affected side, even to the foot. Epilepsia without aura.

ZIZIA AUREA.

Therapeutics.

Hysteria. Chorea, *especially during sleep*, fidgety legs. (*Tarentula.*) Epilepsy. Hypochondria, desire to commit suicide. Dry cough, with stitches in the chest, dyspnoea, aggravation in evening and night. Intermittent neuralgia of the left ovary.

Dr. R. W. Works on the Principles
of Homœopathy.

TEXT BOOK

OF

MEDICINE AND SURGERY

on Homœopathic Principles.

BY

M.D., L.R.C.P., M.R.C.S., L.M.
(Lond. and Edin.), &c.

*For the use of the Medical Student, the Clergyman, the Missionary,
the Traveller, the Soldier, the Sailor, the Head of Families, &c.*

Some Volume. Demy 8vo, 1,082 pages, cloth.
Price, 3s. 6d.; or **Half-morocco, 25s.**

Together, the most complete Text Book for the use
of the physician, which has ever been published for our
country, the best work on practice, but its value is not confined

to the medical profession. It will convince any one that it is a most comprehensive
work, and differs so much from ordinary chapters on that
subject, that we can only commend it. It does not follow the beaten track of
the ordinary text book, but is fully up to the most advanced discoveries in
the science of bread, tea, coffee, cooking, water, air, sunlight, exer-
cise, and is replete with original remarks such as we have never
before seen in any professional work of its character.

It contains much which the layman and the student want to know, not the
kind of things which most authors deal with. Dr. Ruddock points out clearly
the various points relating to such subjects, and this, we assert, is
of great value.

His chapters on Signs and Symptoms of Disease, is far better than similar
works.

His chapters on the Accessories in the Treatment of
Disease, and his chapters on the Accessories in the Treatment of
Disease, of students go out into practice with very nebulous ideas
of the use of these accessories, and they finally learn nearly all of
them from the hands of the nurses. Dr. Ruddock gives plain and brief directions as
to when they are needed, and in what they should consist, when used as
accessories in the treatment.

"A work fifteen years ago, Homœopathy would have profited
of the experience of old physicians, of large and long practice, it will prove an
assistance in the treatment of disease."—From *The American*
Medical Review.
